My First Book About Outer Space (Dover Coloring Books For Children)

Synopsis

"Entertaining, easy-to-understand captions explain crater formation, constellations, weightlessness, space junk, and other fascinating subjects." — Lunar and Planetary Information Bulletin
Where do we live among the galaxies, what did people think before they could study the sky with telescopes, and what happened to Pluto? Thirty-nine illustrations to color answer these and other questions about our Solar System and beyond. Entertaining, easy-to-understand captions explain crater formation, constellations, weightlessness, space junk, and other fascinating subjects. Suitable for ages 8–12. Winner of a 2015 Moonbeam Children's Book Silver Medal.

An accomplished science and nature illustrator, Patricia J. Wynne is the recipient of the 2008 Theodor Seuss Geisel Honor and has won awards from Parenting Magazine, the John Burroughs Association, and the National Science Teachers Association. Patricia's artwork has appeared in galleries, magazines, newspapers, and more than 100 books for both children and adults. She is the author of numerous successful Dover titles on science and design.

Used this to teach space to my two children whom I homeschool in first grade. Was perfect to organize our learning and we supplemented with books, youtube videos and other things online.

This coloring book has great quality paper. None of that thin paper. It folds flat enough I can make copies for the kids and was a little advanced for the kids I bought them for but has great detail.

great book with great info

My 8 year old granddaughter loved this book.

My son is obsessed with the planets so he loves this book.

My 6 year old nephew is freakishly smart and lately obsessed with the solar system. He was bored the other day so he decided to write a book about how the solar system was formed. I thought this would be perfect for him (as he loves art as well) and I was right. He's reading on second grade level and this is just enough text to challenge him. He loves it so much and is excited to tell his teacher about saturns 52 moons

Bought as gift and seems to be a good choice for a child who is fascinated with outer space

Great detail and fun to color while also educating you on the planets! Lots of cool facts!
