Business Statistics: Communicating With Numbers (Irwin Statistics)

Synopsis

Overview: The second edition of *Business Statistics: Communicating with Numbers* provides a unique, innovative, and engaging learning experience for students studying Business Statistics. It is an intellectually stimulating, practical, and visually attractive textbook, from which students can learn and instructors can teach. Throughout the book, the authors have presented the material in an accessible way by using timely business applications to which students can relate. Although the text is application-oriented, it is also mathematically sound and uses notation that is generally accepted for the topic being covered.

Customer Reviews

I've never had a stat class before. This book was required for the online class I just finished; I got an A, so I must have been doing something right. The material in the book was, at times, convoluted & difficult, but that's the nature of statistics I guess. Real-world examples are presented in this book, so I could relate to the situations given. I'm not particularly inclined towards numbers in general, so I just followed the book material & worked through the problems one by one. If you actually take the time, work the problems (most even-numbered practice problems have answers in the appendices), & STUDY, this book will be a great source for you.

It was a rental but it looked almost new. The book isn't well laid out. It is super dense, literally, they fill the pages to the brim with text. But there are nice appendixes...appendix...appendi

great for school. at a decent price.

This item is everything I expected it to be, and everything it claimed to be.

Book was in excellent condition!!!

Book DOES NOT COME WITH ACCESS CODE, DO NOT BUY IF YOU NEED THE ACCESS CODE. Packaging was neat and book was pretty nice.

I love this book, its cases, excel examples and problem sets.

Excellent condition.
