# Andrew Moore: Dirt Meridian

## Synopsis

In *Dirt Meridian*, Andrew Moore takes to the air to document the High Plains of North Dakota, South Dakota and Nebraska in a series of stunning, large-format photographs. The "meridian" of the title refers to the 100th meridian, the longitude that neatly bisects the US and has long been considered the dividing line between the East and West. Much of the meridian traverses America's so-called flyover country, those sparsely populated landscapes between the urban centers on either coast. Other parts of the meridian cross contentious zones such as the heavily fracked Bakken formation in North Dakota. *Dirt Meridian* interweaves two stories: the myths and history of the vast, severe American High Plains alongside portraits of the people who live there today. Along the way, Moore worked with ranchers, farmers, crop dusters, game wardens, writers and historians to capture the mythology and reality of the High Plains. Many photographs in this book were taken using a specially modified camera in a low-flying plane; the resulting pictures, with their literal bird's-eye view, offer a unique perspective on this quintessential, seemingly boundless American landscape. American photographer Andrew Moore (born 1957) is widely acclaimed for his photographic series, usually taken over many years, recording the effects of time on the natural and built landscape.

## Book Information

Hardcover: 140 pages

Publisher: Damiani (September 29, 2015)

Language: English

ISBN-10: 8862084129

ISBN-13: 978-8862084123

Product Dimensions: 14.2 x 0.7 x 11.1 inches

## Customer Reviews

I find so many of the photographs to be moving, dignified, and deeply sympathetic, I am not sure you can ask more of a photographer. (Lyle Rexer Photograph Magazine)

I got this as a gift for a very special person who loves the land (North Dakota) as much I as do (Nebraska). We have become accustomed to our own snapshots of favorite places, and even with wonderful digital cameras, we don't get the sweep that matches our emotions as we gaze at the land and sky. Andrew Moore and the pilot who mounted a camera on the wing strut open up the land as it goes toward the horizon--sunshiny and ready to harvest, or bleak, it's bigger than we are. In all these years man has safeguarded it or mistreated it, it still reminds us how dependent we are upon it. Even if we break it, something will be there after we are not. This book reminds me of my love for the land--of my neighbors' love for the plants and crops it produces, the animals that graze upon it--of our longing to be worthy stewards, and to live WITH the natural cycles rather than to manipulate until we betray the land.

Out of this vast Plains country photographer Andrew Moore travelled from the Dakotas down to Texas and took sixty remarkable photos for the book. What makes so many of his images rather special is that they were taken with a camera mounted on the wing of a small plane. This enabled him to cover the vast distances easily and land near visual interesting places for a ground shot. The idea clearly paid off because as well as the aerial shots there are others well away from roads and tracks which a road bound photographer would never find. I thought the aerial photos particularly fascinating because the Cessna Cub allowed Moore to get close enough to buildings (frequently abandoned) and vegetation to reveal the feel of landscape. The first photo in the book stretches over a spread and shows a small schoolhouse, built in 1900, set in the brown countryside with no road, pupils went to school by horseback. Other aerial shots show farms with two or three building and no other structures or trees for miles. This is more than a book of excellent landscape photos, the human side of the Plains is revealed with images of fracking in North Dakota, pipelines, freight trains, pivot irrigation, cattle farming and some portraits of hardy folk who are happy to live in this rather inhospitable country. 'Dirt meridian' is a beautifully produced and printed book, the back pages have two essays and thumbnails of all the photos with interesting captions. Like his 2010 photo book of Detroit ruins (also published by Damiani) Andrew Moore has delivered a fine selection of Plains imagery.

What a great book if you care about the 100th meridian - even if you don't, you'll like the images and the text - they're beyond compare

Beautiful and compelling.

This is a book that we can relate to here in the Sand Hills of Nebraska, in fact, my husband found a picture of a house he had worked on in the late 50's early 60's and we saw several places we recognized. The pictures are excellent.

Love, love, love the pictures. Andrew Moore went above and beyond to capture the hidden beauty of the 100th meridian. He really captured the soul of the land.

Wendell Berry tells us we must feel an affection for place if we want to survive. I feel an affection for the places of "Dirt Meridian" and now have a little more hope for our future.

This is a gorgeous document about the middle of the U.S. - a landscape that most folks on the coasts dismiss, but Moore shares it with insight and reverence. Highly recommended.
