The Tiny Traveler: Italy: A Book Of Numbers

Synopsis

How many gondolas float down the canal? Can you count the number of masks at Carnival? Toddlers will answer these questions and more in this new book from Misti Kenison in her Tiny Traveler series. Travel from Rome to Venice as you and your little one count your way through Italy's most famous landmarks. From one leaning tower to seven fresh pizzas coming out of the oven, you'll catch the travel bug while teaching children the basics of counting! The fourth book in Kenison's Tiny Traveler board book series will expose your child to another country and culture while teaching him or her the basic concept of counting and numbers. So sit back and explore the world with your little one from your very own living room. Traveling to foreign places has never been so fun, or educational, for young children before! A wonderful series for young toddlers (0 to 2 years), this book teaches the basic concept of numbers and counting. Can be used at home or in a childcare facility to teach basic concepts.

Customer Reviews

Misti Kenison is a web/graphic designer and owner of MK Design. As a new mom, she believes strongly in encouraging literacy at a very young age, and hopes that this series will be a great tool for other parents to do so as well. She is the author of the Tiny Traveler series. She lives in Little Rock, Arkansas.

This is a fun book to practice counting! Children will possibly get their first look at special landmarks

from this country. Though not only landmarks but foods and transportation that are deeply rooted in the country of Italy! There's the leaning tower of Pisa, St. Peter's Square, the opera, grapes, pizza, gondolas, masks worn at the famous carnival, the Colosseum, art, and cypress trees! Reading the descriptive text and counting is a lot of fun with this book. I love knowing that through this book my children are becoming a little more cultured. Even though this book is meant for 0-3 years old. I plan on taking a few things from it and making up a fun unit study for my oldest kids. What fun it would be to make our own pizzas and learning about the leaning tower of Pisa or perhaps the Colosseum? The illustrations are simple yet engaging. The short text on each page sticks. The counting is fun. It's geographic fun!

Sky Pony Press recently published two board books for kids from author Misti Kenison, and I had a chance to review both. The third and fourth books in the Tiny Traveler board book series expose toddlers to other countries and cultures while teaching them about nature and numbers. **THE TINY TRAVELER: ITALY: A BOOK OF NUMBERS:** This book includes landmarks and cultural elements from Italy (leaning tower, pizzas, gondolas) in an easy-to-follow book about counting. Early readers will get to practice counting along with viewing bright, clear illustrations to learn a bit about Italy as well. As someone who loves to travel and really values a global perspective, these are really fun books that I wish had been around when my kids were younger! I love the idea of exposing kids to global cultural images while incorporating basic educational themes as well!

I loved traveling when I was single and hope to continue traveling once my youngest is older. But even in the comfort of home I can take the littlest family member on a fun journey. It's all thanks to the Tiny Traveler Board Book Series. We absolutely loved both of these books! They are great to learn about what things are unique to the country being represented. The colors and the pictures used are beautiful. My little Sophie who's 6 months old didn't take her eyes off these books. Even the big boys loved these books.

This is the fourth book in Kenison's Tiny Traveler series. Her mission is to expose children at a very young age to other countries and cultures around the world. This particular book teaches little ones the concept of numbers. These colourful board books are a perfect size for little hands to maneuver and are brimming with large well-orchestrated and defined illustrations. The simple text is written so toddlers can comprehend and enjoy the books while learning about the world in which they live. The world is waiting to be discovered and explored between the covers of these books..."The Tiny

Traveler: Italy" is a book about numbers. Children are encouraged to count the number of statues that are looking down on St. Peter's Square, the number of opera singers preparing to perform on stage and the number of paintings that are artfully hanging in the museum, just to name a few. The journey takes you from Rome to Venice as famous landmarks are unveiled for your child's learning pleasure. How fun to count your way through the book as you nibble on one of the foods that Italy is most famous for... PIZZA! This book is sure to have your child asking for more... to read the book one more time and of course one more slice of pizza! Yum to both!

Arrived damaged in multiple places, but my toddler probably would have damaged it soon anyway. Cute book though.

I expected better illustrations and just an overall better story....i returned the book...not worth even showing to my grandson
