Title: Cool kid travel guides they'll actually readAuthor: Mir; Cool Mom Picks websitePublisher: coolmompicks.comDate: 07/25/2010 When we moved to Georgia, I tried to pad the transition with various books about what a great place it was and the interesting things that have happened here. My efforts were met with a resounding "meh" from my children. Hmph. Of course, the brand new Cool Stuff Every Kid Should Know city guides from Arcadia Kids weren't around, back then, otherwise I could have gotten them the Atlanta book and totally won them over. Even though we live here, now, both kids pronounced this little book "totally cool," and why not? It's chock-full of not just

landmarks and suggestions on things to do, but also kid-friendly city trivia, intriguing photography, and even the wry acknowledgment of the city's 50+ streets all named Peachtree. Right now there's eight city guides packed with goodies including Charleston, Cincinnati, Houston and that hotbed of tourism, Buffalo, New York. Pick one up before a trip, or grab your own hometown as part of a "what can we learn around here" adventure. I promise you won't be disappointed.

My Thoughts on Charleston, SC: Cool Stuff Every Kid Should Know Dang It! This book came about a week too late. Lulu, Coco, and I spent 4 days and 3 nights in Charleston over the long weekend. But it was still fun to read, and it will come in handy when we travel back to Charleston. One of my best friends from college moved to Charleston right after we moved to Columbia, so we'll be back to visit soon. This book of cool stuff tells a little bit about Charleston history, some of which we learned while we were there and some of which is new to us. For example, we learned this fact while touring the Charleston Harbor: The longest cable-stayed bridge in North America spans the mouth of the Cooper River at Charleston Harbor (page vii). We also saw sweetgrass baskets being made and we briefly visited Battery Park, both described in the book. My daughters and I laughed at what we called "poop pouches" on the back of the horses used for horse-driven carriages. The book describes them as diapers LOL! Evidently the author was on the same page we were on! We will definitely keep this book and refer back to it when we visit Charleston again. I like the way the book is divided out. It describes the history of Charleston, some fun facts about the city and how it was formed, it includes information about the state of South Carolina, plus it tells about current festivals and popular museums. Author: Piera Jolly Publisher: JollyMom.com Date: 12/13/2010 Children learn best when learning is fun, right? That's why I love the new Cool Stuff Every Kid Should Know book series by Arcadia Publishing. These books each feature a U.S. city--highlighting all the things a kid should know about the city. Right now, there are eight books in the series covering the following cities: Charleston, Atlanta, Orlando, Tampa, Buffalo, Cincinnati, Houston, and Dallas. Each book contains fun facts about the city and also teaches kids about the state. What I love about this series is that the books are not overwhelming or worst...dry and boring. These are geared at kids so the books are short and information is fun and engaging

while still being educational. The pages are glossy and full color with LOTS of pictures. I live in Atlanta so I was especially interested to read about all the "cool stuff" that every kid should know about Atlanta. I found out a bunch of things I didn't know myself like it is the only place in North America where you can see largest fish--the Whale Shark! During this time of the year, so many of us are traveling to different states to visit friends and family. I think the Cool Stuff Every Kid Should Know book series by Arcadia Publishing would be awesome for road trips or travel of any kind. Bring the book in the car or on the plane and learn all about the cool stuff to do and see where you are traveling to. Quiz each other and make a game out of it! These would also make fun stocking stuffers! To learn more about the series, please visit ArcadiaPublishing.com.

Publisher: wiredprnew.com Date: 6/18/2010 Monday, June 21 is National Summer Learning Day! No--it's not a new holiday invented by the greeting card industry. It's an effort launched by the National Summer Learning Association to highlight the need for continuing academic support for kids during their summer "time-off." Educational children's book author Kate Boehm Jerome agrees that the so-called "summer slump" or "slide" is a real phenomenon. "It's well documented that if kids don't engage in at least some kind of educational activity over the summer, they can lose some serious academic ground" says Jerome. So how can you avoid the backsliding while still giving your kids some well-deserved down time? Jerome's advice to parents: Keep it simple! "You don't need an elaborate plan and you don't have to spend a lot of money" says Jerome. "As little as ten or fifteen minutes a day of meaningful engagement can make a difference." Jerome recommends taking advantage of "teachable moments" throughout the day--but with a twist. "When my kids were growing up, I'd ask them to read things to me all the time. It didn't matter whatâthe back of a cereal box, an article in the newspaper, a short passage from a new book. The kids really enjoyed the notion of teaching me new things rather than vice versa" smiles Jerome. And what about the struggling reader? "Try not to overwhelm your child" advises Jerome. "Small successes can lead to big gains. Early on, my son struggled with reading so he gravitated toward non-fiction books loaded with short passages of interesting facts. After he found success with those kinds of books, he soon moved on to more challenging reads. You may have to search a little harder --but certain books will grab even the most reticent reader. And if a book inspires even one questionâthen there is opportunity for the learning cycle to continue!" Jerome should know. She's spent her entire career developing successful educational programs that have been read by literally tens of thousands of

kids--of all ability levels--over the last 25 years. Her most recent non-fiction series "Cool Stuff Every Kid Should Know" was created for Arcadia Publishing and features eight U.S. cities (Houston, TX; Orlando, FL; Dallas, TX; Cincinnati, OH; Tampa, FL; Buffalo, NY; Atlanta, GA; and Charleston, SC)--with more to come. Jerome designed The Cool Stuff series to showcase a city and state from a kid's point of view. "By the Numbers," "Sights and Sounds," and "Strange But True" are just a few of the fun features that engage kids and get them talking. However, Jerome knows the magic ingredient is really found outside the pages of her books. "I love it when kids and parents dig into one of my Cool Stuff books together!" says Jerome "And, I'm even more thrilled when my book gets tossed aside because it inspired an interesting conversation or a real-life adventure!"

Title: Everything Charleston in a colorful, kid-friendly book
Author: Staff Writer
Publisher: Moultrie News
Date: 10/29/2008

Cool Stuff Every Kid Should Know is a colorful, easy-to-read book for children ages 7-11 featuring attention-grabbing cover art, inviting conversational style content, and vivid full-color images of landmarks and geography. Parents, grandparents, and shoppers will appreciate the feel good factor of purchasing a book that is both fun and educational. The book's benefits for children include:

- Encourage ownership and stewardship of their hometown by having kids think about their "own backyard"
- Stimulate curiosity through facts that are interesting and unique. Kids may not be impressed hearing about carriage rides downtown, but they are extremely eager to discuss the diapers on the carriage horses (included in the book).
- Provide information in an easy-to-read format. Most city-specific books for children are reference in nature. Charleston facts fill the first 16 pages, followed by 32 pages on South Carolina. Essentially two books in one, Charleston, SC: Cool Stuff Every Kid Should Know teaches readers not only about their town but also about their state. Available at area bookstores, independent retailers, and on-line retailers, or through Arcadia Publishing at www.arcadiapublishing.com or (888)-313-2665.

About the Author
Daniel Island resident Kate Boehm Jerome loves to write educational books for kids. She has developed multiple award-winning programs - including a 75 book science series for National Geographic.

Article Title: Author focuses on kid-size need
Author: Brenda Rindge
Date: 11/4/2008

While helping her elementary-age niece research a school project about South Carolina, Daniel Island author Kate Boehm Jerome realized there was a void in the book-publishing market. "Although there were many good books available, most of them were large reference 'tomes,' she says. "So I decided to write a little kid-size version that I thought a young student might actually be able to read from cover to cover." Jerome, president of educational consulting business

KNI, knows what she's talking about. She's the former president of textbook publisher Scott Foresman and in the past 25 years has written more than 80 educational books for kids in the 8 to 12 year-old range. Topics have included the brain, energy, space the Hunley, Jane Goodall, Amelia Earhart and Marie Curie for publishers such as National Geographic and Penguin Putnam. She is working on a 36-book science series with former astronaut Sally Ride. Several of her titles are on the Accelerated Reading list for grade-school students. Jerome thought about the Charleston project for a few months and decided she could squeeze it into her schedule, often by working in the middle of the night. "This was a personal challenge. The more I got into it, the more it became a labor of love." The result is a colorful, soft-cover book of 16 pages of Charleston facts and 32 pages on South Carolina. Jerome's goal was for it to be easy to read, fun and educational. As she wrote, she kept her audience in mind. "On a carriage ride, a child is not listening to the guide," she says. "He is looking at the diaper on the horse. Kids love to see the humor in things." She hopes kids will learn without realizing it. It's my biggest delight when a kid picks up a book and there is something in there he has seen or heard or talked about," she says. Jerome may not be done with Charleston history. "Depending on the response to the book, we may do some more," she says. "It's funny how little labors of love, if they fill a niche and need, can grow to be something more significant." The book is the first children's product published by Arcadia Publishing's new division, Arcadia Kids. It's available at area bookstores, the S.C. Aquarium book shop, Waldenbooks, Barnes & Noble and online. It retails for \$7.99. Jerome will have a book signing at 2 p.m. Nov. 23 at the Women Authors Holiday Book Signing at The Citadel Holiday Alumni House.

My husband and I went to Charleston in early April and loved it so much we want to bring the kids on the next trip. We thought this book would be a nice addition to their Easter baskets and get them excited about going in the Fall. Well unfortunately only the first quarter of the book is actually about Charleston and the rest is just information on South Carolina. It is a nice colorful book but not what we wanted. The title of the book is definitely misrepresented and deceiving. If you want a book about SC then this is a great book but if you want one about Charleston pick a different one.

All the books in this series were exactly the same except for a few words changed to fit the topic at hand. Totally not worth buying.

The content of the book was good, but the center pages of the book all started falling out on the first day we had the book, without even having used it.

This is more like a promotional pamphlet.

Our grandson enjoyed this book while on a trip to Charleston. Very informative.

Excellent product. Fast delivery

We bought this for our 10 year old before visiting Charleston. It's a great book on facts and interesting information. It is not a story book nor does it have typical chapters. It's an easy to read book with short descriptions of areas and facts. Great book for "Did you know?" type conversations.

Dang It! This book came about a week too late. Lulu, Coco, and I spent 4 days and 3 nights in Charleston over the long weekend. But it was still fun to read, and it will come in handy when we travel back to Charleston. One of my best friends from college moved to Charleston right after we moved to Columbia, so we'll be back to visit soon. This book of cool stuff tells a little bit about Charleston history, some of which we learned while we were there and some of which is new to us. For example, we learned this fact while touring the Charleston Harbor: The longest cable-stayed bridge in North America spans the mouth of the Cooper River at Charleston Harbor (page vii). We also saw sweetgrass baskets being made and we briefly visited Battery Park, both described in the book. My daughters and I laughed at what we called "poop pouches" on the back of the horses used for horse-driven carriages. The book describes them as diapers LOL! Evidently the author was on

the same page we were on! We will definitely keep this book and refer back to it when we visit Charleston again. I like the way the book is divided out. It describes the history of Charleston, some fun facts about the city and how it was formed, it includes information about the state of South Carolina, plus it tells about current festivals and popular museums.
