ANDREW SANSOM is Executive Director of the River Systems Institute at Texas State University-San Marcos. One of Texas's leading conservationists, he is a former executive director of both the Texas Parks and Wildlife Department and the Texas Nature Conservancy, as well as the founder of the Parks and Wildlife Foundation of Texas.

This was purchased for my grandson's college class. We received it.

Thorough, intelligent, accessible. Dr Sansom lays out the background and the issues that must be addressed in Texas if we are to have adequate water resources in the near future. Taught me a lot. I will use this as a reference for years to come.

Hell of a book. Very well written and lots of data. Should be read by every Texas by the age of 12. Maybe our future would be brighter.

This is a good beginner's text to the water issues in the Lone Star State. A great deal of information, and a good reference guide.

It was required for a college course, but what a fun read of Texas water! Easy and fast to read. Very much enjoyed, and....learned something too!
