Conversations With Chiropractic Technique Masters

Synopsis

“We are living in the age of information, and chiropractic is a part of it. It is a very exciting time to be a chiropractor. Our profession is poised for exponential growth. It is the right profession at the right time. We as chiropractors provide a service to humanity that no other kind of doctor has to offer.”

“The world of healthcare is changing before our eyes. The public is ready for the kind of care only we can provide. The technologies I present here are the products of some of the best and brightest minds our profession has ever produced.”

In *Conversations With Chiropractic Technique Masters*, Dr. William H. Koch clearly shows his profession to be a scientifically based, constantly evolving 21st century health care discipline. A renowned chiropractor, noted author and authority on advanced chiropractic techniques, Dr. Koch presents a series of interviews with some of his profession’s brightest and best researchers and innovators. He calls upon his 45 years of experience to engage in meaningful discussion of the unique characteristics and clinical relevance of each technique. Beyond merely describing each technique, he relates his own personal experience studying and using them in his own practice with with superb results.

“My objective is to provide the chiropractic community with up to the minute information on the new technologies that are available. I also hope to motivate practicing chiropractors, whether new to the profession or experienced practitioners, to elevate their skill sets beyond the stereotypical image of ‘bone cracker’ into the realm of the highly qualified specialist. Chiropractors with advanced training are able to provide their patients with safe, effective, natural health care that extends far beyond the treatment of back and neck pain.”

“We owe it to ourselves and our patients to always provide the best state of the art care our profession has to offer. Chiropractic provides us with unlimited opportunities to expand our vision, knowledge and skills. Each of us is a work in progress. Ideally, we will grow and evolve as people and healers throughout our lifetime and practice. When we pursue excellence through the ongoing study of our science and art, the rewards are endless. They manifest in material success, but even more importantly in the emotional and spiritual satisfaction that being a true professional provides.”

Customer Reviews

I really and enjoyed reading this book and feel that it was extremely valuable because it gave me a priceless information about healing methodologies I never even knew existed. I especially appreciate that the book was under \$10 and I was able to purchase the Kindle edition, which I could read immediately.

I really enjoyed this book. It gave me a much needed update on the newest trends in this still evolving alternative health care. I am always looking to find a better way to care for my post Lyme disease syndrome and reading about these exciting practioners gives me additional thoughts on how to best manage my pain and fatigue.

For a small book it is a great intro look at some of the latest techniques within chiropractic. Not meant to be a tutorial but an intro to the founders as well as their technique. Highly recommended for patients or chiropractors who know there must be something more that can be done to correct the nerve interference to my body's innate ability to heal.

Excellent

useless interviews no concrete info. forget it
