# Cosmosophy: Cosmic Influences On The Human Being

## Synopsis

With these words Steiner describes the relationship between inner and outer realities. In a sense deeper than normally recognized, the mind-body split is the result of a fear to penetrate the mindâ the inner human being. This lack of inner courage rebounds on society and civilization, producing the terrible conditions modern humanity finds itself surrounded by. And real healing will not come until we can summon the courage to penetrate the hidden inner mysteries. These themes and many more are explored in these insightful lectures.

Rudolf Steiner (1861â 1925) was born in the small village of Kraljevec, Austro-Hungarian Empire (now in Croatia), where he grew up. As a young man, he lived in Weimar and Berlin, where he became a well-published scientific, literary, and philosophical scholar, known especially for his work with Goetheâ s scientific writings. At the beginning of the twentieth century, he began to develop his early philosophical principles into an approach to systematic research into psychological and spiritual phenomena. Formally beginning his spiritual teaching career under the auspices of the Theosophical Society, Steiner came to use the term Anthroposophy (and spiritual science) for his philosophy, spiritual research, and findings. The influence of Steinerâ s multifaceted genius has led to innovative and holistic approaches in medicine, various therapies, philosophy, religious renewal, Waldorf education, education for special needs, threefold economics, biodynamic agriculture, Goethean science, architecture, and the arts of drama, speech, and eurythmy. In 1924,

Rudolf Steiner founded the General Anthroposophical Society, which today has branches throughout the world. He died in Dornach, Switzerland.
