Customer Reviews

Grade 5 Up-In the first section of this book, Huegel introduces 10 young people, each of whom has a chronic illness. They explain how they were diagnosed; medical management; and how they deal with family, friends, and school. They share how they have fashioned a satisfying life for themselves despite the limitations their conditions might impose. The diseases discussed are hemophilia, diabetes, epilepsy, asthma, cancer, inflammatory bowel disease, juvenile rheumatoid arthritis, congenital heart defect, and lupus. Each chapter is accompanied by a small black-and-white photograph of its subject, followed by questions and answers about the disease and a list of resources including organizations, books, and Web sites. Part two discusses strategies for managing an illness; maintaining a relationship with a doctor; dealing with friends, family, and school; battling fear of hospitals; finding a support group; and planning for the future. The text, written in a conversational, sympathetic tone, is sprinkled with upbeat quotes. Advice is terse, well organized, and to the point, making it easy to remember, if difficult to carry out. There are many books that relate stories about the disease of the month, but Huegel's focus is on how these kids manage their own lives and how their experiences can help others cope with chronic illness. A good

choice for any collection. Martha Gordon, formerly at South Salem Library, NY Copyright 1998 Reed Business Information, Inc.

A good choice for any collection. -- School Library Journal This book is a source of strength, inspiration, and sound advice for young people diagnosed with chronic illnesses. -- Ingram

My disabled daughter really loved this book. It helped her think about her own chronic illness and that she was not alone. She was then in elementary school but still recommends it.

This book is a touching piece which puts a human face on the many stories of dealing with chronic disease. It can--and should--be read not only by the families and friends of children who deal daily with chronic disease and adversity, but also by all of us whose actions have the ability to touch another's life. This book is a straightforward way to see the thoughts and feelings behind the brave face put on by so many children with chronic disease, and I am a better person for having read it. Many cheers to Ms. Huegel and her team for wonderful work. *Young People and Chronic Illness* should be required reading for pre-med and children's service personnel the world over.

"This is one of the most insightful and thought provoking books that I have ever read on chronic diseases. It delves into the the private recesses of human emotion and accurately describes the uncertainty and fear that all of us with chronic diseases suffer. It is the first book that I have read that departs from the typical medical/technical babble to address the human side of the equation and, further, it speaks to the youngest people affected. I would recommend this book strongly not only to those who have to deal with this issue, but also to those who care about people dealing with chronic disease -- and who among us does not fall into that category."

Once we reach adulthood, I think we often forget how difficult it is to be "different" as children. Ms. Huegel's book was truly inspirational, and although ideal for individuals and families dealing with chronic illness, its message of hope is inspirational to everyone. I highly recommend this book--you'll truly be touched by the children you'll meet and their stories, eloquently presented by Ms. Huegel's professional yet surprisingly personal writing style.
