Customer Reviews

How does a fact make it into a Weird But True book? First, it has to be weird. Our team of editors and writers scour the news, the latest discoveries, Internet gems, urban legends, wacky myths, and tantalizing tidbits to find a fact that's really weird. It also has to be true. So our researchers check every single word to make sure the fact is 100 percent accurate. It has to look cool. Our photo editors and designers find the perfect weird picture or the most dazzling weird design to make each fact jump out at you. Then we put them all together in an amazing-looking book that's so much fun kids can't put it down.

I am not including this in my Christmas box of books for my 7 and 9 year-old grandsons. I am putting it in my car in case we ever have a "Nana, do you have any more books for us in here?" moment. What even marginally curious child would be intrigued by facts such as these: The SuperSoaker water gun was originally called the Power Drencher; Zucchinis are about 95 percent water; President Gerald Ford once worked as a park ranger; You can buy Thanksgiving-themed gumballs with flavors such as cranberry, turkey, and pumpkin pie...? This book does no credit to National Geographic, and I suggest that Shoppers leave out of their carts.

I LOVE this book. Bought copies for my 3 grandsons (ages 8 & 10) and one for myself. Filled with weird and interesting facts with excellent photos. I'm sure this could become a very popular book for kids and school libraries. I do feel there could have been footnotes sighting where the information/facts came from, or a link to find that info on-line. (Some of us like further "proof"). Highly recommended.

My teenager loves books of facts so by now we have all seven versions of this book. There are very few repeated facts between any of the books - he LOVES this series. The information is presented well and is interesting for all ages (at least in our family!). If trivia is your thing, this is the book for you.

For a girl that loves animals and wants to some day become a veterinarian, this is the perfect funny book. My 10 year old is a true animal lover. She says that she wants to be a vet and change the way people view wild animals - and love on the tame ones. She finds this book hilarious and is constantly sharing one of the 300 weird but true facts. Some are hard to believe, but are apparently true. This books is definitely a win in our household and we are looking forward to another edition.

Purchased for my grandson & he loves it. We keep it in the car so as we are traveling he gets to practice reading - without even realizing it- The facts and photos are really interesting & random - covering all types of subjects. Plus we are all learning new info

My daughter loves to read facts about nature, animals etc. this book was great for her to have light reading and learn something about the world around her.

Interesting book. Kept my granddaughter fascinated for a long time

This book has occupied my daughter for hours. She loves reading the facts to us. I recommend this book for kids around 10 years of age.
