McGraw-Hill Education 3 MCAT Practice Tests, Third Edition

Synopsis

MCAT* Prep from the Name You Trust No matter how much material you review throughout your preparation for the MCAT, you need the experience of taking a full-length model exam prior to test day. This book provides 3 full-length practice tests modeled closely on the real exam. These three tests will give you a clear idea of what to expect on test day. Written by a team of distinguished university faculty, these tests will give you the intensive practice you need to get your best score. You get:

- 700+ questions that simulate the real exam in format and degree of difficulty
- Reading passages and question sets that mimic those you will see on the actual MCAT
- Complete coverage of all MCAT sections: Biological and Biochemical Foundations of Living Systems; Chemical and Physical Foundations of Biological Systems; Psychological, Social, and Biological Foundations of Behavior; and Critical Analysis and Reasoning Skills
- Thorough explanations for every question
- Evaluation charts that will show you where to focus your review
- Strategies that will help you on test day
- A wealth of review content available online

Book Information

Publisher: McGraw-Hill Education; 3 edition (December 27, 2016)

Language: English

ISBN-10: 1259859622

ISBN-13: 978-1259859625

Product Dimensions: 8.4 x 1 x 10.6 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars 4 customer reviews

Best Sellers Rank: #470,836 in Books (See Top 100 in Books) #86 in Books > Education & Teaching > Higher & Continuing Education > Test Preparation > Graduate School > MCAT #3505 in Books > Textbooks > Test Prep & Study Guides #8350 in Books > Education & Teaching > Test Preparation

Customer Reviews

• Completely matches the changes introduced to the MCAT in 2015

• 3 full-length practice tests simulate the real exam in format and degree of difficulty

• Free online resource offers a complete review of MCAT subject areas

George Hademenos, PhD, Candice McCloskey Campbell, PhD, Shaun Murphree, PhD, Jennifer M.

Warner, PhD, Amy B. Wachholz, PhD, and Kathy A. Zahler, MS, are university professors and widely published test prep authors

Helpful; quick

I had our library purchase this book thinking it would be helpful to our students and instructors for preparing for the MCAT exam. I noticed immediately that the content was quite different than that of the AAMC practice exams, this book having relatively little biochemistry compared to the AAMC practice exams. I then found a question asking about how GMOs are made and how DNA is "removed" from one organism to place in another. There were several options including restriction enzymes and PCR. Having made GMOs myself I'm quite aware that BOTH PCR and restriction enzymes can be used to clone a gene. The answer section stated something along the lines of "PCR only copies DNA", which is technically accurate but that's also a perfectly acceptable way to "remove" a gene from an organism, by making a copy of it. Clearly whoever wrote these practice exams are lacking in some areas of expertise.

I found the questions easier compared to Kaplan and officially MCAT practice test, but still helpful with explanation of every question. Also would have loved to have an accurate scale related to the MCAT.

for every fake 5 star on this, i'm putting a 1 star to balance it.
