The text is ok but the attached "sapling plus" code is useless. This product should not be advertised as having an online component as this is misleading, there is no online access unless your professor sets up your subject, which currently only appears possible in US and Canada. I would say the text itself is probably worth 3.5 stars, but the quality of the paper is terrible. It is extremely thin - obviously they are trying to cut down on cost/volume/weight, but I would much prefer they use better quality, thicker paper. As it is you cannot highlight using a normal highlighter. This appears to be happening all too frequently with textbooks. Very disappointing.
