Practical Phlebology: Venous Ultrasound

Synopsis

Authored by three of the leading world experts in phlebology, *Venous Ultrasound* is an essential text for anyone involved in the treatment of chronic venous disease. It provides specific information on ultrasound as it is applied to chronic insufficiency, including history, general techniques, examples of anatomy, and protocols for performing ultrasound on patients. Focusing on the fundamentals that every phlebologist needs to know, the book includes color illustrations and numerous line drawings for a complete learning experience. Key features:

- Covers anatomy related to venous insufficiency
- Includes useful diagrams and images to aid understanding

Thoroughly up to date, with all the latest information for those practicing venous therapies

Venous Ultrasound

Customer Reviews

Series Editors: Lowell S Kabnick MD FACS, Director, New York University Vein Center Division of Vascular Surgery, NY, USA; Neil S Sadick MD FAAD FAACS FACPh, Clinical Professor, Department of Dermatology, Weill Medical College, Cornell University, USA; Authors: Joseph Zygmunt Jr, Florida, USA; Olivier Pichot, Grenoble, France; Tracie Dauplaise, North Carolina, USA

I ordered this book thinking it would really help me in our vein clinic practice and it was very basic. This would be a great book for beginners. Unfortunately I sent mine back and ordered something

more advanced

One of the best books I have read on lower extremity venous US. Comprehensive and well written explanations and technique.

well structured presentation of ultrasound basics and about ultrasound applications to venous anatomy, pathology and diagnostic process.....

Just Interesting. Maybe a nice book for beginners !!!

Practical Phlebology : Venous Ultrasound is well written by a leader in the field of venous disease treatment (Phlebology). This book is another in a series edited by Drs. Kabnick and Sadick, leaders in the field for the Practical Phlebology Series. It is a great book for the libraries of physicians and sonographers who take care of patients with venous disorders and also those preparing for the RPhS certificate.
