Hazardous Chemicals In Products And Processes: Substitution As An Innovative Process (Sustainability And Innovation)

Synopsis

Substitution of hazardous substances is a prioritised objective in chemical regulation and risk management. However, it is experienced as a tough task with often inconsistent results. Based on thirteen case studies, this book analyzes substitution as an innovation process and attempts to give answers to the following questions: Why and under which circumstances are companies able and willing to substitute hazardous substances? What are the main drivers and the main barriers? In which way can communication along the supply chain support environmental innovation? How can risk management appropriately deal with the lack of knowledge, with uncertainties and incomplete knowledge about the possible effects of different substances? Recommendations for action are provided for commercial and state institutions and consumers and thus for all actors engaged in the European reform of chemicals policy following the REACH system.

Book Information

Series: Sustainability and Innovation

Paperback: 152 pages

Publisher: Physica; 2006 edition (December 1, 2005)

Language: English

ISBN-10: 3790816426

ISBN-13: 978-3790816426

Product Dimensions: 6.1 x 0.4 x 9.2 inches

Shipping Weight: 9.1 ounces (View shipping rates and policies)
