Thick, sturdy paperback I bought for my little unschoolers. They drag it around everywhere and have identified several birds.

One of the best references for birds I've seen. Gives great suggestions for locations you may have opportunities to view various birds. The photos are good, descriptions in detail. I really enjoy it. Highly recommended.

Great selection and easy to use book. I'm going to get it spiral bound for quicker searching, but I really do love it.

Great book. Compliments the other books I have.
