Sterling DAT Biology Practice Questions: High Yield DAT Biology Questions

Synopsis

DAT Biology best seller! 1,500+ DAT biology practice questions with detailed explanations covering all biology topics tested on the DAT:

- Part 1: Cell and Molecular Biology
- Part 2: Structure and Function Systems; Development
- Part 3: Genetics
- Part 4: Evolution, Ecology, Diversity and Behavior

Book Information

Paperback: 546 pages

Publisher: CreateSpace Independent Publishing Platform (April 22, 2014)

Language: English

ISBN-10: 1499211171

ISBN-13: 978-1499211177

Product Dimensions: 8.5 x 1.2 x 11 inches

Shipping Weight: 2.1 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 33 customer reviews

Best Sellers Rank: #421,810 in Books (See Top 100 in Books) #10 in Books > Education & Teaching > Higher & Continuing Education > Test Preparation > Graduate School > Graduate Preparation #139 in Books > Education & Teaching > Higher & Continuing Education > Graduate School Guides #402 in Books > Medical Books > Dentistry

Customer Reviews

Scoring well on the Biology portion of the DAT is important for admission into dental school. To achieve a high score, you need to develop skills to properly apply the knowledge you have and quickly choose the correct answer. You must solve numerous practice questions that represent the style and content of the DAT questions. Understanding key science concepts is more valuable than memorizing terms. This book provides 1,500 biology practice questions that test your knowledge of all DAT Biology topics. In the second part of the book, you will find answer keys and detailed explanations to questions, except those that are self-explanatory. These explanations discuss why the answer is correct and - more importantly - why another answer that may have seemed correct is the wrong choice. The explanations include the foundations and details of important science topics needed to answer related questions on the DAT. By reading these explanations carefully and understanding how they apply to solving the question, you will learn important biology concepts and the relationships between them. This will prepare you for the Biology section of the DAT test and will significantly improve your

score. All the questions are prepared by our science editors who possess extensive credentials and are educated in top colleges and universities. Our editors are experts on teaching sciences, preparing students for standardized science tests and have coached thousands of undergraduate and graduate school applicants on admission strategies. Used books may have outdated content. We make content updates regularly based on customers' comments, editorial input and latest test changes. The most current version is only available directly from (sold & shipped by), Barnes & Noble and Sterling Test Prep web store.

Section 1: Cell and Molecular Biology
Eukaryotic cell: structure and function
Molecular biology of eukaryotes
Cellular metabolism and enzymes
Specialized cells and tissues
Microbiology
Photosynthesis
Section 2: Structure and Function Systems; Development
Endocrine system
Nervous system
Circulatory system
Lymphatic and immune systems
Digestive system
Excretory system
Muscle system
Skeletal system
Respiratory system
Skin system
Reproductive system
Development
Section 3: Genetics
DNA and protein synthesis
Mendelian genetics, inheritance patterns
Section 4: Evolution, Ecology, Diversity and Behavior
Evolution, natural selection, classification, diversity
Energy flow, nutrient cycles, ecosystems, biomes
Populations, communities, conservation biology
Animal behavior
Answer Keys & Explanations

The book of questions and explanations is excellent. I did well in Bio in college but this practice was very helpful. Spend time to read the explanations as this is where many good concepts can be applied to answering the question and, in general, to answering other questions with similar concepts. Told my friends about this book.

My friend took the DAT last year and he recommended the books. They were thorough, challenging and extensive in reviewing bio concepts. I learned a lot and I needed the extra practice. Very happy with the book.

The questions were diverse and tested many important concepts for DAT biology. I both learned many new things and reinforced what I thought I knew. The explanations were great. I really needed to practice questions and this book is excellent. My roommate used the book and she told me about it. Great book and I am happy that I used it for DAT prep.

It's a good resource for biology questions. If you feel like Destroyer questions are too much to handle, this may be a solid substitute. But I'd recommend using it with Destroyer. I feel like some questions are more MCAT oriented (dealing with V_{max} in depth, etc) but it's undoubtedly a good source.

This book is a really good source of biology multiple-choice practice questions. It covers topics covered on DAT bio section and questions have 5 answer choices, which is what I needed. Very good and detailed explanations that go through many important concepts. Would recommend to others.

Great preparation for the DAT. Excellent source of practice questions for the biology component of the exam. Challenging questions with detailed explanations. By reading the explanation, I really improved my understanding of the material. A few of my friends, in the past, used other materials with mixed reviews. Here, I really benefited from this book and have told my friends that plan to prepare for the DAT about these study guides. I used the Sterling Prep General chemistry book and was equally satisfied and impressed with the detailed explanations. Content of the chapters matches what is covered on the DAT. I used the online component to refine my learning and obtain a diagnostic report of my progress in biology from the practice.

I am biology major and have a solid foundation in the sciences. This book has great DAT biology practice questions. I really liked the explanations where I was able to evaluate if I got the right (or wrong) answer compared to the information I know (or should know) to solve the problems. I learned many new details even though I am strong in bio. I like the practice questions that are divided into the same topics as tested on the DAT.

Results are in and I am very happy with my scores; science in particular. I used these biology practice questions to focus my studying. I had been reviewing the content for the DAT and needed

to take practice questions to flush out my understanding for strengths and weaknesses. Very valuable material here (along with the gen chemistry book). Highly recommend these practice questions to be sure that you are ready for the types of questions on the DAT. The detailed explanations helped me reinforce my learning. These also helped for those questions that I had not been exposed to from my preparation of the topics. I was prepared and somewhat relaxed going into the exam because I know I spent sufficient time studying and was ready.
