# Real Wolfmen: True Encounters In Modern America

## Synopsis

What's hiding in the woods? Here is the definitive account of today's nationwide sightings of upright, canine creatures which resemble traditional werewolves and a thorough exploration of the nature and possible origins of the mysterious beast. "She has the ability to send chills up and down your spine." •Brad Steiger, author of *Real Ghosts*, *Restless Spirits*, and *Haunted Places* "If you thought the likes of *The Wolfman*, *The Twilight Saga: Eclipse*, and *Underworld* had no basis in fact, it's time to think again!" •Nick Redfern, author of *There's Something in the Woods* "Real Wolfmen is a riveting work of amazing scope and depth. You'll be hooked from the first page."--Rosemary Ellen Guiley, author of *The Encyclopedia of Vampires and Werewolves* The U.S. has been invaded if many dozens of eyewitnesses are to be believed by upright, canine creatures that look like traditional werewolves and act as if they own our woods, fields, and highways. Sightings from coast to coast dating back to the 1930s compel us to ask exactly what these beasts are, and what they want. Researcher, author and newspaper reporter Linda S. Godfrey has been tracking the manwolf since the early 1990. In *Real Wolfmen* she presents the only large-scale cataloguing and investigation of reports of modern sightings of anomalous, upright canids. First-person accounts from Godfrey's witnesses who have encountered these creatures everywhere from outside their car windows to face-to-face on a late night stroll describe the same human-sized canines: They are able to walk upright and hold food in their paws, interact fearlessly with humans, and suddenly and mysteriously disappear. Godfrey explores the most compelling cases from the modern history of such sightings, along with the latest reports, and undertakes a thorough exploration of the nature and possible origins of the creature.

## Customer Reviews

"Her chilling story of deep woods journeys will fascinate you." —Whitley Strieber's Dreamland  
"An amazing and well-researched look at werewolves in the US." —Werewolves.com  
"She has the ability to send chills up and down your spine." —Brad Steiger, author of Real Ghosts, Restless Spirits, and Haunted Places  
"Real Wolfmen is a riveting work of amazing scope and depth. You'll be hooked from the first page." —Rosemary Ellen Guiley, author of The Encyclopedia of Vampires and Werewolves  
"Godfrey impresses me with the sheer totality of her information. Nothing is left unexplored, if possible." —John R. Ellis, Fourth Day Universe  
"If I was to ask you what two words are most relevant to the phenomenon of werewolves and lycanthropes you might well say 'Full' and 'Moon.' Or, 'Silver' and 'Bullet.' Well, you're definitely on the right track, but I say those two words are 'Linda' and 'Godfrey'! Yep, not only is Linda the most well-known chronicler of all-things wolfman-themed, but she's certainly the most prolific one, too. This new title from Linda is one that I definitely recommend to anyone and everyone who has voraciously devoured Linda's previous studies of the werewolf phenomenon. And if you're a newcomer to the subject, and want to learn what it's really all about, it's just about the most important book you can read on the phenomenon to date. And I don't write words like that lightly." —Nick Redfern, Mysterious Universe  
"By the time you finish Real Wolfmen: True Encounters in Modern America, you just might believe." —Jason Carter, The Writers Journey  
"It is hard to believe that such a creature could exist. However, the witness accounts in Real Wolfmen are often very compelling. Pick up a copy and see for yourself." —Alejandro Rojas, Huffington Post

Linda S. Godfrey is America's foremost authority on modern-day werewolves. She is the author of over a dozen books on werewolves, hauntings, and the paranormal, including the popular Weird Michigan. Godfrey has appeared on many national TV shows such as The History Channel's Monster Quest, Inside Edition, and Sean Hannity, and has been a guest on

radio shows such as Coast to Coast AM, and Wisconsin and Michigan Public Radio.

Welcoming you to the world of crypto (unknown)-zoology (animal); Linda Godfrey's compilation of nefarious dog-man encounters will open your mind to the truly bizarre and unnatural. Her collection of incidents and reports; many of which she investigated herself, are both compelling and profound. Nonetheless, she presents case after case of these unbelievable and well-written accounts that really left me struggling for air. Time and time again these witnesses have come forth with their stories of seeing something unexplainable and un-nerving. Imagine, if you will, a six to seven foot tall, upright walking werewolf-like creature, complete with pointed ears, muzzle, and mangled fur that seems to appear out of nowhere and stalk its beholder with both a physical rush and psychological imprint that implies "IT" is in control of the encounter. As unreal as that may seem, it happens more times than you can imagine and is a world-wide phenomena that has caught the attention of many of us who find these mysterious creatures existing in that finely tuned Fortean zone of uncomfortableness. To that end we are drawn, subtly and without knowing why. Further into these bizarre accounts, the author begins her assault on our common rationality and enters the realm on the edge of interdimensional realities and ideas that truly plague the light-hearted. Even I was lying awake in deep thought as to the meanings of these meetings and lost many hours of sleep. I suppose the reason being my own writings and conjecturing about such things as Bigfoot, UFOs, and the paranormal in general. But then again if you take this lightly, you will miss the ride of your life. A common misconception of most who delve into the paranormal is that they can remain objective; no matter the scope and intent of an authors work and will walk away unscathed. Nothing can be farther away from the truth. I believe Godfrey has endeavored and succeeded in presenting to a skeptical and pragmatical society, an idea that clearly exhibits a deep and almost philosophical aura of understanding and warmth towards an otherwise taboo array of cryptid, lycanthropic meddling. I especially like her quotes from sources such as the late John A Keel (Operation Trojan Horse) and Nick Redfern; also an expert in this strange business. The authors' knowledge and years of investigational reporting put her among the top of the field of were-beasts and other everyday mundane monsters that crop up along the waterways, crossroads and cemeteries of Wisconsin and her jovial brevity makes it a fun read amid the seriousness of its contents. Her first book "The Beast of Bray Road" is what started it all, and I look forward to reading it. But this thing shines! I really thought it was well written and informative in a style that demands your attention. Anyone with even a slight interest in the subject matter won't be disappointed. For all of the above, I give this most excellent source of data, information, and interpretation a full five stars. I highly

recommend this work.

I have been fascinated by werewolves ever since I was a kid when my mom brought me and my older brother to the movie theater to see "An American Werewolf in London". It scared the hell out of me and I had nightmares for months afterward. (Way to go mom!) Ever since I can't get enough of them. I devour any werewolf story, (except the stupid romance ones) that I can find. I knew them to reside in the fantasy world even though I always high-tailed it out of the woods when the sun started to go down and constantly checked my backtrail with an unhealthy level of paranoia. I didn't really believe they may actually exist until I read this book. All be it, Dogmen is more of an apt description for them; as the author points out they are for the most part not likely to attack humans. MAYBE. wouldn't personally want to find out. Guess the book didn't exactly help my paranoia. It is very well researched and extremely interesting in it's scope of the paranormal.

At 334 pages, this is packed with short interesting accounts of the sightings of what are called Wolfmen. The author makes reference to what God says about the Gadarenes and how one of these creatures was said to utter a word sounding like "Gadara." It is interesting that 34 uses of the word "howl" are used in the AV1611 to reference Babylon (the church of Satan and home of spiritual wickedness) and that wolves would enter in. It is this reader's opinion that most of the accounts of sightings in the book are genuine. The most interesting account to me is the St. Coletta story involving Rosemary Kennedy. Linda leaves the reader with some of her theories on what these creatures could be. Babylon wants to expose and make hypotheses. God says we must only reprove. Ephesians 6:12 "For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places."

The book is very well organized. The author presents a trove of cases-incidents involving werewolf-like creatures. It was hard to put the book down. Well researched, well written and even scary enough to check that all windows and doors are locked at night. Good book, no complaints.
