Mini Weapons Of Mass Destruction 2: Build A Secret Agent Arsenal

Synopsis

If you're a budding spy, what better way to conceal your clandestine activities than to miniaturize your secret agent arsenal? *MiniWeapons of Mass Destruction 2* provides fully illustrated step-by-step instructions for building 30 different spy weapons and surveillance tools, including:

- * Paper Dart Watch
- * Pen Blowgun
- * Rubber Band Derringer
- * Mint Tin Catapult
- * Pushpin Dart
- * Cotton Swab
- * .38 Special
- * Toothpaste Periscope
- * Paper Throwing Star
- * Bionic Ear

And more! Once you've assembled your weaponry, the author provides a number of ideas on how to hide your stash inside a deck of cards, a false-bottom soda bottle, or a cereal box briefcase; and targets for practicing your spycraft, including a flip-down firing range, a fake security camera, and sharks with laser beams.

John Austin is a professional toy designer and author of MiniWeapons of Mass Destruction: Build Implements of Spitball Warfare and So Now Youâ™re a Zombie.

This book is SOOO fabulous. It got two 13 year old boys to put down their Xbox controllers for several days on multiple occassions. My son went to the dollar store and spent his own allowance to buy supplies to make all the cool stuff in this book. Not that it's necessary, you will probably have stuff to make this at home, but he wanted to make it ALL. We have already pre-ordered the third book and are anxiously awaiting it's arrival. The first book was great, too. Although we all preferred this one over the first.

Purchased this book after seeing Book 1 at a maker fair event. Some dollar store office supplies and instructions from this book have enabled my 11 yr old and his friends to make some "mini-weapons" and have a great time. They also make their own targets. (I last saw a "target pig" constructed of paper towel rolls, paper plates, and a tissue box.) I'd advise giving this to a RESPONSIBLE 11 year old (along with safety glasses) as one example of ammunition from this book series is darts made of straight pins stuck in pencil erasers. This is a great adventure and imaginative use of time for tween boys in this era of over-protective play.

this was a christmas gift. it arrived quickly, well packaged and was just as described. recipients liked it.

Bought this book off of . Liked the idea, figured it might be cool to check it out, possibly make some cool stuff to give to people as gifts or jokes. Upon receiving it, I found that many of the projects inside were pretty time consuming, which is definitely something that I wish that I would have known when I purchased the book. That being said, a good amount of these projects are fairly simple **WITH PREVIOUS EXPERIENCE**. If you aren't very good at making stuff, this book will walk you through it but not necessarily without any confusion. The instructions can get a little trivial at times. But, if you're up for the slight time commitment, looking for a way to eat up some time, and are willing to put forth a little effort to get a few cool homemade gadgets out of it, this book is probably for you.

These books are great, especially if you have kids, lots of fun little projects to do with them.

Bought the whole series for 15 year old son and he absolutely loves them. Of course, I am now having to replace my office supplies that he keeps stealing to build things with. Great for getting kids interested in doing something with their hands that is not electronic and hooked to a video console. Helps them think outside of the box. He has used what he learned in these books to build his own very creative inventions. Am planning on buying one of the books with some supplies for my nephews for Christmas.

I purchased this for my teenage nephew and after opening his other presents-he is a very polite and thoughtful young man-he began reading and building the projects found in the book while still at his grandparent's house. He was able to build at least two projects before leaving. The book will provide him with many hours of project building fun. It helps with following plans, understanding schematics, and the joy of seeing your crafted item actually work using items found at home.

my sons just love this book
