The Rehabilitation Specialist's Handbook

Synopsis

The 4th Edition of the gold standard of rehabilitation resources is now in full color and thoroughly revised and updated to reflect the art and science of practice today! A compendium of frequently used, but rarely memorized information organized for easy reference, it covers an extraordinary breadth of topics – from the full range of basic scientific information (neuroanatomy and clinical neurology, osteology and clinical orthopedics, general anatomy, cardiac and pulmonary anatomy) to the treatments and methods used in modern rehabilitation practice. With its outcome and evidence-based focus and several expert contributors, this text is a must for PTs at any stage in their career.

Customer Reviews

Great book and the seller did an excellent job of getting it here quickly. I'm a PTA with more than 20 years of experience and this is a great tool to help me give my patients the best care I can. My thanks to the seller for getting it so quickly. Truly a positive experience all around.

I'm in my second year of PT school now and was encouraged to purchase this book by a professor. It's a great concise reference on all of the things a PT needs to know. It's small enough to carry and has a durable vinyl cover, I'm looking forward to using it on my upcoming clinicals.

Wonderful quick reference. A must have for clinicians and soon to be clinicians.

A great read and valuable information for future Physical therapist assistants.

Great review over everything we need to know!

Needed this book for school. All is well with this purchase.

great

Great Resource!
