Using Nursing Research To Shape Health Policy

Synopsis

Examining the crucial interrelationship between nursing research and health policy, this book presents examples of specific health care policies that have been influenced, implemented, or changed as a result of nursing research. It builds on the discussion of this relationship in the editors' earlier book, *Shaping Health Policy Through Nursing Research*, named a Doody's Core Title in 2013 and an AJN Book of the Year in 2011. This book updates earlier information with new nursing research by esteemed scholars. It encompasses research related to major policy directives of the decade, including the Institute of Medicine's *The Future of Nursing* report, the Affordable Care Act, and the genomic nursing science blueprint, and highlights how they have influenced, and will continue to influence, health policy. Relevant for a wide range of readers, including undergraduate and graduate students, faculty, and nursing professionals, the book describes how science shapes health policy in general, discusses models and strategies for linking research and health policy, and presents multiple examples of how major nursing research has influenced health policy. The text provides both a conceptual orientation and an operational approach to strategies linking research to policy and influencing policy makers at the organizational, community, state, national, and international levels.

Key Features: Offers examples of cutting-edge nursing research providing a foundation for practice and policy
Incorporates major policy directives of this decade and highlights how nursing research has influenced health policy
Demonstrates to undergraduate and graduate students, faculty, and nursing professionals how nursing research can shape health policy decisions
Includes perspectives, models, and strategies for using nursing research to influence health policy
Addresses how nursing research shapes policy at organizational, community, state, national, and international levels

Book Information

Paperback: 414 pages

Publisher: Springer Publishing Company; 1 edition (March 3, 2017)

Language: English

ISBN-10: 0826170102

ISBN-13: 978-0826170101

Product Dimensions: 7 x 0.8 x 10.1 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Customer Reviews

Patricia A. Grady, PhD, RN, FAAN, has been affiliated with the National Institutes of Health (NIH) since 1988, first as an extramural research program administrator in the National Institute of Neurological Disorders and Stroke (NINDS), then as a member of the NIH Task Force for Medical Rehabilitation Research and assistant director of NINDS, until 1995, when she was appointed director of the National Institute of Nursing Research. Under her leadership, the institute has more than doubled its budget and significantly increased the number of research and training grants awarded. Dr. Grady is an internationally recognized researcher on the topic of stroke. She also served as a faculty member at the University of Maryland School of Nursing and School of Medicine. She has co-authored numerous articles and serves on many journal editorial boards, including *Stroke*, *Stroke and Cerebral Vascular Diseases*, and *NeuroTherapeutics*, the journal of the American Society for Experimental NeuroTherapeutics. Dr. Grady is a member of the National Academy of Medicine and has been the recipient of several prestigious awards, including the Policy Luminary Award from the American Academy of Colleges of Nursing, the Second Century Award for Excellence in Health Care from Columbia University School of Nursing, and the honorary doctor of science degree from Thomas Jefferson University and the Medical University of South Carolina.

Ada Sue Hinshaw, PhD, RN, FAAN, is dean emeritus and professor emeritus, Graduate School of Nursing, Uniformed Services, University of the Health Sciences, Bethesda, Maryland, and dean emeritus and professor, University of Michigan School of Nursing, where she served as dean from 1994 to 2006. Dr. Hinshaw was selected as an American Academy of Nursing (AAN)/American Foundation of Nursing/Institute of Medicine Senior Nurse Scholar from 2006 to 2007. She was also the first permanent director of the National Center of Nursing Research and the first director of the National Institute of Nursing Research at the National Institutes of Health (NIH). During her tenure at NIH, Dr. Hinshaw was responsible for promoting research in the areas of disease prevention, health promotion, and acute and chronic illness, as well as investigating environments that enhance nursing care and patient outcomes. She has conducted research in quality of care, patient outcomes, measurement of outcomes, and building positive work environments to enhance patient safety. Dr. Hinshaw is the recipient of many awards for her work, including the Midwest Nursing Research Society Lifetime Achievement Award, the Health Leader of the Year Award from the U.S.

Public Health Service, the Award for Excellence in Nursing Research (Sigma Theta Tau), the Nurse Scientist of the Year Award (ANA Council of Nurse Researchers), the Living Legend Award from the AAN, and the Walsh McDermott Award from the National Academy of Medicine. She has received 14 honorary doctorates.
