Creating With Laser Cutters And Engravers (Getting Creative With Fab Lab)

Synopsis

This text provides readers with an exploratory lens into the general world of the Fab Lab with an in-depth focus on two specific types of machinery: laser cutters and engravers. These machines give users the unique opportunity to create through the removal of material from its source. Included for readers are hands-on tips and tricks for operating laser cutters and engravers, providing a variety of projects for every experience level, all the while connecting these skills to real-world business models and careers. This title tackles the arts and design element of STEAM more than any other Fab Lab machines do.
