Customer Reviews

My friends, the book did not lie, because I soon found myself lost in the enlightenment of the struggles of a single Mom of two (Ms. Dey herself) trying to make her way through legal jargon in her everyday life, while being bombarded by life telling her in so many frightening ways that she was a failure. Because what is probably most frightening for a Mother, and able to bring psyche to its lowest level, is perceiving that she is not protecting her children. Ms. Dey, aiming to remain a good Mom even after death, presents the worthiness of writing a will with advice on how to do so by covering simple questions like "Do I need a lawyer to write a will?" to "How will the process unfold of my writing a will transfer into my former assets coming into the hands of my children after my death?" Aurorah Dey did not set out to put her children, or herself for that matter, in jeopardy. But she did, and she did it the way most of us do--by being ignorant of the laws, the apparent and the obscure, of our American land. Ms. Dey learned the hard way that she must protect her loved one's by mixing the ingredients of love, which is intangible, with the concrete protection of American laws

until it is a smooth blend of true life; that is, we should strive to be spiritually free to love AND protect ourselves against poverty, hunger, homelessness simultaneously. I believe Ms. Dey's book is most successful because she does not write down to those not in her main audience of single Mom's. Her writing welcomes diverse readership. Each of us, parent or childless, are afforded a sound lesson that teaches us that there is, indeed, protection under the law--we just have to be willing to believe that we need and deserve said protection.

Yesterday as I had work done on my car I re-read this book. I've been a business owner for a few years and was totally unaware of just how crucial asset protection is not only for myself, but for all of us. After her own unfortunate experiences as a result of not protecting her own assets Ms. Dey has so graciously utilized her knowledge to put together this book which provides a wealth of information on the subject that we can all benefit from. An exceptional job was done of condensing so much information between such a small amount of pages. I've recently started researching asset protection and unlike much of the information that is out there, I really appreciate the fact that Ms. Dey is very practical in her approach on the subject. You need not have any background at all in "legalese" to understand this book. Everything is clear cut! It is simply a very well written book which accomplishes all that she set out to do with it. It is a great launching pad that covers enough bases to get you into motion and deserves more than 5 stars. I cannot thank Ms. Dey enough and will certainly recommend this book to everyone that I know, (business owner or not!). There is no one in my life who I feel does NOT need this book. Mission accomplished Ms. Dey!

This book is a Godsend because I to am going through some issues in my life in regards to assets etc and when going through such turmoil you quickly learn how the system is not protecting the average Americans! This book educates you that not only is there a blueprint for protecting you your assets and your family but gives you hope that all your hard work will not be lost through ignorance!!!

This book gives you the knowledge/tools necessary to enable you to make smart decisions regarding your financial life. I have worked very hard to obtain my assets and my priority is to protect those assets and my family's future... This is a MUST read.... You will be motivated to cover your Assets...

I have been looking for a book like this for a very long time. Terrific author and a terrific book.!!!!!!!!!!!!
