Customer Reviews

If becoming an online entrepreneur is a dream that you are pursuing, then I highly recommend you grab this book to learn from some of the best entrepreneurs in the business. This book is a wealth of information that is not only inspirational but, each of the interviews is as much about the failures made to get there before they

found success. The book is a massive compilation of 101 online success stories of people who are making money and living their dream. The entrepreneurs interviewed are authors, bloggers, podcasters, product developers, coaches and freelancers. "Internet Business Insights" is very well organized. The book covers the main areas of: * Teachers and Coaches* Service Providers and Product Developers* Authors, Crafters and Other Artistic Types* + 30 skills and lessons learned. The interviews themselves follow the same format by asking each entrepreneur specific questions about their business. For example: * How did you come up with the idea for your business?* What was your first major breakthrough?* How long did it take you to reach 100% digital freedom?* What was your biggest mistake?* What is the single most effective tactic you discovered?* What advice would you give someone wanting to achieve success? Great questions that leads the way for each of the 101 entrepreneurs to teach future digital nomads how to succeed and thrive in a growing business online. What is also impressive is the list of entrepreneurs featured here. To give you a taste of who is on the inside, you can read about interviews with: * John Bura of MammothInteractive.com* Cody Barbo of Industry.co* Matt Bodnar of ScienceOfSuccess.co* Jeff Brown of ReadToLeadPodcast.com* Yvonne DiVita of LipstickingSociety.com* Mark Goblowsky of MarkGoblowsky.com* Sarika Kharbanda of MindSpaces.com* Patrick King of PatrickKingConsulting.com* Jeff Sanders of JeffSanders.com* Michael Sliwinski of Nozbe.com* Jeff McMahon of TBC.fit* Brad Wilson of EnhanceYourEdge.com* Grant Cardone of GrantCardone.com* Lise Cartwright of HustleAndGroove.com* Kate Erickson of EOFire.com* Dave Fuller of ProfitYourselfHealthy.com* Josh Hoffman of EpicFreelancing.com* Akshat Choudhary of BlogVault.net* Kyle James of Rather-Be-Shopping.com* Derek Doepker of EbookBestsellerSecrets.com* Stephen Guise of StephenGuise.com* Jesse Krieger of LifestyleEntrepreneursPress.com* Shawn Manaher of BookMarketingTools.com* Derek Murphy of CreativIndie.com* Jyotsna Ramachandran of HappySelfPublishing.com***The Final Word on Internet Business Insights***Yes, it is a massive list of 101 awesome people sharing their inspirational stories and valuable lessons. If you are looking to make money as a freelancer without the major hassle of a boring 9-5 job, then grab the book and get to work. A definite "resource goldmine" compiled into one book. A definite recommend read for your online success in 2017.

You cannot fail to be motivated and pumped after reading this book. There are so many gems to take away. It doesn't matter if you are starting your business or looking to take it to the next level. You WILL find inspiration from this book. The biggest thing for me was not just about what the top

entrepreneurs are doing right, but seeing that every single one has made gigantic errors that seemed huge at the time but ultimately allowed them to push further towards their goals. It shows that the path to success is littered with challenges, but to really create change you must stay the course, follow your plan and fully commit. You can dip into and out of this massive book, but I found that I was devouring page after page. I am building my career as an author and speaker and I know I am going to be constantly going back to this book as I continue on my path. The author should be commended for getting so many diverse businesses and business people to open up and really show what is required to be successful.

What if you could get over 80 people into a room, sit them down, and then ask them how they created a successful business? And even better than that, ask them to cough up their biggest mistakes and failures? Think maybe you'd learn a thing, or two? Save a dollar or two? And more importantly, save a year or two of wasted time and frustration? Me too. Covering well known and little known players. This book is helpfully broken down into topics. Whether your love is writing, product creation, creating apps, podcasts, this book will have something for you. But I recommend you read the full book to learn the most you can from it.* Even though I got a free review copy of this book. Anyone who can get the great Jimmy D Brown to add his thoughts to the mix, is doing something right. Best of luck with the book, Chris, you've created a great asset for all of us.

I really enjoy books like this, no fluff and straight to the bone action. There's a ton of inspiring advice from different people (or entrepreneurs) who have "made it" online and who were interviewed to create this book. Now, not every single case study interested me but the ones that did, inspired me in ways that right now I'm already taking action on what I believe I need to do next. Questions throughout the book include: how did you come up with the idea for your business? what was your first major breakthrough? how long did it take you to reach 100% digital freedom? and what was your biggest mistake? Plus a few more and they also ask what would be the most valuable advice these people could give to anyone who is trying to build an online business as well, for me this part was the most valuable but the entire book is super solid advice on all matters. Highly recommended to anyone interested in building an online business.

While this book focuses on online entrepreneurship, many of the lessons shared by the contributors apply to offline businesses and professionals who are embarking on their first business or practice. Reading chapters by 101 contributors sounds daunting at first and this where I appreciate

the structure of the book and chapters and the format of asking each entrepreneur specific questions about their business. The book covers the main areas of: * Teachers and Coaches * Service Providers and Product Developers * Authors, Crafters and Other Artistic Types * + 30 skills and lessons learned. You will find many of the lessons come up over and over again which shows there are basic lessons to be learned irrespective of the online business niche. Internet Business Insights is not the kind of book you read once and put aside, it is the resource you will want to return to again and again for inspiration and guidance.
