Suns Of God: Krishna, Buddha And Christ Unveiled

Synopsis

Picking up where the bestselling and controversial *The Christ Conspiracy* leaves off, *Suns of God* leads the reader through an electrifying exploration of the origin and meaning of the world's religions and popular gods. Over the past several centuries, the Big Three spiritual leaders have been the Lords Christ, Krishna and Buddha, whose stories and teachings are curiously and confoundingly similar to each other. The tale of a miraculously born redeemer who overcomes heroic challenges, teaches ethics and morality, performs marvels and wonders, acquires disciples and is famed far and wide, to be persecuted, killed and reborn, is not unique but a global phenomenon recurring in a wide variety of cultures long before the Christian era. These numerous godmen were not similar "historical" personages who "walked the earth" but anthropomorphizations of the central focus of the famous "mysteries." A major element of the cryptic, international brotherhood, these mysteries extend back thousands of years and are found worldwide, reflecting an ancient tradition steeped in awe and intrigue. The reasons for this religious development, which has inspired the creation of entire cultures, are unveiled in this in-depth analysis containing fascinating and original research based on evidence both modern and ancient, captivating information kept secret and hidden for ages. *Suns of God* is possibly the most complete review of the history of religion from its inception ever composed in a single volume.

Book Information

Paperback: 595 pages

Customer Reviews

"Suns of God" supplies vital knowledge for anyone claiming to be an authority on world religions.

Kenn Thomas -- Steamshovel Press A must-read for any human with the courage to search for literal

truth as opposed to salves... -- American Anthropological Research Foundation Achieves a rare level of scholarship essentially proving the non-historicity of religious figures such as Krishna, Buddha and Christ. -- Tim Leedom Amidst the chaos of Bush's War on Terror, largely founded on religious intolerance, Acharya is the voice of reason. -- Paranoia Magazine/Joan D'Arc

Acharya S's books continue to move into the category of "Classics" that stand the test of time and endure through the ages. No book shelf on the history of religion would be complete without "The Christ Conspiracy" and "Suns of God."

If I had nothing else to say here, I could definitely say that Acharya S has done her homework and has carefully documented her sources, showing the depth of her research and scholarship. This is a long book, and quite detailed, but it is not difficult to read or understand. No matter what one's religious views are, Suns of God provides information that ought to be of interest even if only for its historical value. I believe it offers more, however, as it provides a new way of looking at old stories that prompts a desire to dig even deeper; and having read this book by Acharya S, I am eager to read more from her.

The genius of this book is the way it takes the macro view of the three major historical religions. Rarely do we find such a clear focus from such a wide angle point of view. By zooming out on the three religions, and I mean zooming all the way out into outer space and looking back at them from a space satellite point of view as it were, the author discovers similarities that are not apparent in a close up examination. As it turns out viewing these religions from such a far distance, from the perspective of our sun looking down on planet earth, turns out to be a natural and organic viewpoint to take. It is, in fact, the proper angle from which to view the origins of these religions, for only from this macro perspective do we discover what they share in common. We discover the roots of the three major religions are grounded, earthed, and birthed in solar mythology. This is the common baptism in light shared by each of the three major religions. Such a revelation becomes apparent only by taking the macro view. That is the genius of the author's approach in this book. This book is not light reading but it is illuminating for those who wish to view the three major religions from a cosmic perspective.

The most comprehensive author on this subject. So much that it has taken the rest of the field to catch up to how thorough this book is in comparison to other works. There has been many

naysayers about Acharya S, and I've personally seen that they haven't even read her work despite their unsupported criticism. I use this book more like a reference book so don't expect it to read like a narrative novel as it is so jam packed with info it would be impossible to remember it all in one sitting. I cringe to imagine how many laborious hours of research and study has gone into writing this book as it seems to leave almost no stone unturned....truly amazing work.

This is a very important book. The writer shows with tons of information and historical references how ancient religions were created and how they hang together. It also explains how biblical texts are really to be understood and how they were designed to impart information to the initiated while leaving the uninitiated with stories that were never meant to be taken literally. Read this book and you will understand how billions of people are caught in the matrix - a surreal world conjured up by cunning priests over centuries. For a comparison with the Bible and other holy scripture I recommend *The Life of Apollonius of Tyana*. It was written in antiquity and at the time millions believed the miracles described in it just as today many believe the miracles of Jesus.

I've been searching for the perfect material provide factual information and less opinion based theology and I came across this book by Acharya S. I believe that everyone w/ an ounce of knowledge must thoroughly read this book and understand the information provided about how astrotheology is a basic fundamental aspect in the world's modern religion. Jesus Christ being one of those figures who never existed, but came from the tales of the ancient Egyptian God Osiris into what we see as the Christian doctrine today. Only those who are stuck in the religious everyday theology will never understand that their religion is either a Solar or Lunar sect worshipping the celestial bodies in the sky w/ the Sun and Moon being the central focus. Acharya S. does a brilliant job at providing references to why we are in this mind frame and how much knowledge of the ancient past can help us come out of this mind frame.

Acharya S. is at it again and I am so glad. After reading *The Christ Conspiracy*, I jumped toward this book and am deeply into it now. I won't go on in a lengthy, point by point analysis, but I will tip my hat to the author and publishers of this weighty tome -- putting this out on the market might be an act of bravery in these dark times when the "Religious Right(misnomer)" hold so much sway in the U.S. That only makes this a more exciting and satisfying read. Personally, I grew up going to church and getting "baptized" because my parents made me -- hey, I was a child. After meeting many wonderful Jews, Buddhists, Atheists, Agnostics, Sikhs, etc. I started to really question Christianity. I

have read many books— The Origin Of Species: 150th Anniversary Edition, When God Was a Woman, The Portable Atheist: Essential Readings for the Nonbeliever— and have had endless discussions with believers and nonbelievers (misnomer) alike. Today, I feel comfortable with both "Agnostic" and "Atheist" as convenient labels, because I believe that no one is truly so simple as to be summed up by one word or title. Ask yourself a few questions: Are you curious? Then, satisfy your curiosity and research the controversy. Are you afraid? Fear is a very popular form of mind control. Are you free? Do you believe what is written in only one book or in many? Do you want to see those who are different from you as suffering for eternity for believing differently than you do? Faith and belief are very personal issues and we should do ourselves the favor of investigating our own beliefs.
