Customer Reviews

I was "sent" to this book after reading Susan Kaye Quinn's 'For Love or Money' (and she's actually mentioned as a resource in this book, which is fantastic). I'd been looking for a book on self-publishing that not only covered the main categories of important things on a checklist, but also

gave specifics into how to do so. 'Let's Get Digital' is the first I've found to meet all my criteria. I loved that Gaughran balanced the incredibly useful information in this book through his working knowledge of the self-publishing industry, AND a detailed dive into the traditional publishing industry. I'm a critical person - I like to see both sides of the argument before I can count myself knowledgeable about any one topic. And this is exactly what Gaughran gave me. WHY certain things work as opposed to other choices, instead of only HOW others have managed to make it work for them in the past. This book has both, and it's an incredible resource all on its own that I will be keeping in my library of "Indie Publishing gems" and referring to all my fellow authors within the writing community. As an author, I cannot be grateful enough for this information and the way Gaughran has approached it in such a detailed, organized, and still entertaining manner - not to mention the deliciously long lists of resource links he so graciously added in the Appendices. As an editor whose clients are mostly Indie Authors (or those on the cliff behind traditional publishing rejections before they take the final leap), this book has added invaluable tips, stats, resources, and how-to's for me to share with my clients and fellow authors in order to help boost their own Indie careers - because, let's face it, that's what this is about. We all help each other! David, if you have the time in your day to sift through all these great reviews and manage to glance at this one from a humble reader and Indie Author shooting off in a new career...thank you. THANK YOU. And I've already started 'Let's Get Visible'.

This is a good book, but the examples of authors who have had success is out of date. If you look at the book rankings of these authors, you will see that 90% of them stopped writing, and their books are not selling. Book publishing is fickle, don't quit your day job. Really. The biggest problem on is that you are competing against people who have been out there a long time. They got enough reviews to rank, so they continue to be the top suggested book in that category. If you write a new book, and have fewer than 500 reviews, people do not pay attention. The people who were there first have a big advantage. I am not saying it cannot be done, I am just saying it gets harder every year. About 1 million books are published a year. Without enough reviews and a promotional campaign, you will not sell. The titans of the book world started a long time ago, before everyone decided to write and publish a book. I am doing OK selling books. I'm making enough to survive, but just barely. I very strongly suggest anyone who writes books actually not quit your day job. Unless you have made enough to make a living for over 2 years, do not quit your day job. Books can be a flash in the pan. You are isolated, writing by yourself all day and night. Don't put a lot of money in a cover. Your tastes will change. You will want new covers as you learn about cover design. Most

people say to not bother doing any marketing until you have done 3-4 books. I would agree with that. Regardless of genre, your writing does improve. You can write a good book, and lightning can strike, and it sells well. But, I would not count on it. Just know that in advance. There are a lot of hucksters out there selling book publishing classes. These are people who make a lot of money off the hopes and dreams of writers. A lot of the people they use as examples of selling books are no longer selling, if they ever did. This author is a good writer, but this book is the only book he wrote that is selling well. More people wanting to write books.
