Of all the study materials I have seen (Manhattan, GMAT, Veritas, Knewton, and Princeton Review) you have the best tactics for tackling CR problems. I have literally gone from taking almost 3 to 4 minutes on each CR problem when I started to now around 1.5 minutes each, sometimes faster than sentence correction problems. So, thank you! The PowerScore GMAT Critical Reasoning Bible is one of the best textbooks I have ever read in my life and I am extremely grateful that you have created it. You have simplified and organised this content a way that would enable even a lay person to build an excellent foundation. Alroy Cruz --PowerScore Student Comment

Read the acclaim for Dave's other books, The PowerScore LSAT Logical Reasoning Bible and The PowerScore LSAT Logic Games Bible.

The best of the lot. You need 7-8 days dedicated time to read and absorb all the information in the book. 4 instead of 5 stars is because I already had an accuracy of 88% in CR before I read the book. The information in the book is beautifully organised and helps condition your mind to approach questions in a very systematic way. Read from Ch2 - Ch13 in that order and by the time you finish, you will know how to solve most questions.

After reading the review of this book in many places, I searched for this in several bookstores in Singapore but could not find anywhere then I brought the kindle version from . Now, I know why everyone recommends this book. This is a must have for all GMAT takers. I was able to improve my verbal from 36 to 40 after reading this book. My first GMAT score was 690 and I moved to scored 740 after just going through this book. My CR accuracy improved from 50-60 to 95-100%.

Great book Provide much detail to every single point. Even though there might be too much information you already know, you can scan those content and have the context which I think is very helpful.

Various questions types with more examples .must read before appearing for exam . will recommend this book to my friends.

A must have when studying for the GMAT. This book not only teaches about the exam and how to tackle every sub type of RC question, but also helps you understand the underlying rhetorical reasoning tested on the GMAT.

Either if you 're familliar with the CR section or not you must have this book because it will not only

teach you how to answer correctly but it 'll teach you how to save valuable time. After reading this book i seldom make any mistakes.

This book systematically organizes every GMAT CR question type into "families," with each family possessing its own set of characteristics. Such an organization facilitates a better understanding of each question type because you know what to look for after you finish reading each question. I've gone through the book once already but am going through it one more time to make sure I really absorb the material. Also, the book actually breaks down the concept of an argument and helps you understand the building blocks of an argument in order to be able to attack any question by following the same rules. There's no discussion of cheap tricks to try to find correct answers. This book is an absolute must if you hope to master critical reasoning on the GMAT. It's especially helpful for people like me who are weak in this part of the verbal section because you are given a step-by-step process for approaching every question. Despite the differences in question types, almost every question can be attacked in a similar manner. So it's good to see a book that focuses on the fundamentals of argumentation. The only reason I knocked off one star is because this book could use some more practice questions. There are 50 practice questions, but I don't feel like that's enough. This book should be used in conjunction with the Official Guide.
