Customer Reviews

“Art and Jervis have put together the best reader in the land for an introductory class on international relations. It covers the key theoretical issues in that field and does it with top-notch readings that are easy to follow and represent different and sometimes clashing perspectives. This book is a wonderful starting point for any student interested in learning how international relations scholars think about the world around them.” —John J. Mearsheimer, R. Wendell Harrison Distinguished Service Professor of Political Science at the University of Chicago

“If the Art and Jervis reader didn't exist, someone would have to invent it, but who would do it so well? As an introduction to the excitement of ideas and argument in the field of world politics, this book is unexcelled.” —Robert O. Keohane, Woodrow Wilson School of Public and International Affairs,

Princeton University

Robert J. Art is Christian A. Herter Professor of International Relations at Brandeis University, Research Associate at Harvard University's Olin Institute of Strategic Studies, Senior Fellow in M.I.T.'s Security Studies Program, and Director of M.I.T.'s Seminar XXI Program. In 2006, he was recognized with the Distinguished Scholar Award by the International Studies Association.

Robert Jervis is Adlai E. Stevenson Professor of International Affairs at Columbia University; he is a former President of the American Political Science Association.

What I expected. The book was in overall good condition. There was an underline here or there but it was well worth it for the price. There is a newer version out, but this one was much more affordable for the price and the missing articles can be found online. It was a good introduction to IR and gave examples of real-world scholar articles. There are a few articles written by the authors but also many that include other authors/ well-known scholars in the field. It covered international economy and environment pretty well but left out a lot on terrorism that is relevant nowadays. Those articles can be found online, though. The book was in relatively good condition and came on time, carefully packaged.

Very happy with purchase, just as described and what I was looking for. Arrived right on time

Profs. Art & Jervis have done an incredible job of aggregating some of the best articles on international relations. There are theory-related articles (on realism, neoliberal constructivism, etc.), articles on causes of war, pieces of human rights and humanitarian intervention, and even selections on relatively new topics in the field like terrorism and US-China relations. I have really enjoyed reading this book, and I feel it to be a wonderful starting point for the study of international relations. Some articles are abridged, and they are well organized to provide a cohesive and efficient reading experience.

Because this was a required school purchase, I wouldn't want to give it low stars based on whether or not it was enjoyable to a teenager who was "forced" to read it. It served its purpose.

Perfect

Very integrating work for college students and anyone who is wanting to understand the world of politics and how different groups of society get along with each other in order to preserve a sense of peace on this planet.

Highly recommend this book for graduate level work on international politics. The authors present a wide array of topics that are well researched.

I needed it for class and I was able to rent it from for a decent price. The book itself has interesting articles, but most of which can be found as pdfs online, so I wouldn't recommend buying it.
