## Customer Reviews

There are 60 architectural images in this book. There is a wide variety of building styles from older Dickensian style town scenes to traditional homes and buildings to very modern architecture. The designs range from open and easy to color to more intricate with a little more challenge. This is a great coloring book for me to use when I feel the need to have straight lines and order in my coloring. I do a lot of wild designs but sometimes coloring something like a building helps to get my mind in straight order (especially useful when I need to make a shopping list afterward!) While I love my house, coloring in this book gives me an opportunity to think "what if I lived or worked here? How would I want it to look." This is my second coloring book by Penny Farthing Graphics. They are published via CreateSpace which is generally used for self-publishing. The designs are drawn by a variety of artists from all over the world and are licensed via

Shutterstock.com. What we end up with is a great coloring book (although on thin paper) with a large and varied selection of designs. The pages are printed on thin white paper which is not perforated. The designs are printed on one side of the page with the back left blank. The designs stop well short of the glued binding and can easily be removed with a pen knife if you so choose. The designs all have either frames to finish the edge of the design or have all of the design elements finished so I am not left hanging without a proper ending point. I really appreciate this care in design as it gives me a more finished looking final page. My gel pens and markers all leaked through this paper. My coloring pencils went on well but left a shadow at the back of the page, too. Not a problem, though, as I can put a piece of chipboard or a couple of heavy weight pieces of paper under the page I am working on to keep the ink from leaking through. I am really looking forward to coloring in this book. I'm also really pleased that CreateSpace is offering an avenue for artists (or groups of artists) to self-publish their designs. Added to that, Penny Farthing brings in so many designers in one book, it is a real adventure to color. Between the two, colorists have a huge choice of artwork to choose from. A free sample of this coloring book was provided for test and review purposes.

One of the few adult coloring books that isn't mostly flowers & butterflies, and one that has a defined end to every design (doesn't run off the page) this is a nice change of pace. Another fan has provided photos of the pages, so it won't help for me to include photographs since the pages are exactly as already shown.

I love everything purchased from Marti Jo's Coloring! The quality and subject are always spot on!

Bought it for my wife, and she loves it!

Love love this coloring book get to design the all different kinds of buildings and homes and castles

There are a lot of different styles of coloring pages. Not a lot of them are as elaborate as the one on the cover. There are a lot of simple ones, but it is a nice little coloring book.

It's perfect for architecture fans!

A lot of coloring pages. Basically what it says it is, a lot of architectural drawings of various types of

houses. Some are very detailed, some less so. I think I will enjoy this.
