Ms. Yamin Ma has an M.Ed. in Curriculum Design and Instruction from Queen's University, Canada. Her research interest lies in educational psychology, ESL and Chinese language teaching and learning. She has taught both English and Chinese in China and Canada, and is currently teaching Chinese in an international school in Hong Kong.

This is a workbook where you can trace radicals and characters, but it needs explanatory material. You need to know the meaning of what you are tracing. (Maybe I missed the text!) A lot of Chinese books show how to draw characters, but need to get more into how to use them (like in sentences). You learn best by practical application.

Be advised that this should not be purchased without the textbook. I bought it as a stand-alone product and it was not understandable without the textbook.

See above review, disappointing with many gaps that are not explained in the text.

This textbook is fantastic, especially when paired with the workbook. It teaches your child how to write many different mandarin characters. Would recommend to anyone looking to enhance their child's foreign language experience.

To be honest, I am a native Chinese speaker but I don't know how to use this book.

This is the textbook used in my daughters Mandarin class. She has been learning Chinese for almost 2 yrs now, and making great progress. They only bring the accompanying workbook home, and I have since began learning the language as well. Very helpful, and set up the way kids are learning their own language, in China. Glad I was able to find it here. Easy to follow, and interesting--lol, even for adults.

Picked this up for an immigrant mother who wanted to re-teach her 2 children the language they were born with. It is simple and basic for children as well as for mother, as she is learning English from her US born children and her children are learning to read, write and speak Mandarin. Excellent workbook for both English and Mandarin.

The textbook provides a good introduction for young kids - and for their grandmother, who is going to China with them! Lots of helpful repetition and useful phrases for beginning learners as well as easy to follow lessons on reading and writing the characters. We liked the textbook more than the workbook.
