The Greatest Lie On Earth: Proof That Our World Is Not A Moving Globe

Synopsis

This book reveals the mother of all conspiracies. It sets forth biblical proof and irrefutable evidence that will cause the scales to fall from your eyes and reveal that the world you thought existed is a myth. The most universally accepted scientific belief today is that the earth is a globe, spinning on its axis at a speed of approximately 1,000 miles per hour at the equator, while at the same time it is orbiting the sun at approximately 67,000 miles per hour. All of this is happening as the sun, in turn, is supposed to be hurtling through the Milky Way galaxy at approximately 500,000 miles per hour. The Milky Way galaxy, itself, is alleged to be racing through space at a speed ranging from 300,000 to 1,340,000 miles per hour. What most people are not told is that the purported spinning, orbiting, and speeding through space has never been proven. In fact, every scientific experiment that has ever been performed to determine the motion of the earth has proven that the earth is stationary. Yet, textbooks ignore the scientific proof that contradicts the myth of a spinning and orbiting globe. Christian schools have been hoodwinked into teaching heliocentrism, despite the clear teaching in the bible that the earth is not a sphere and does not move. This book reveals the evil forces behind the heliocentric deception, and why scientists and the Christian churches have gone along with it.

Book Information

Paperback: 724 pages

Publisher: Great Mountain Publishing (January 17, 2016)

Language: English

ISBN-10: 1943056013

ISBN-13: 978-1943056019

Product Dimensions: 6 x 1.4 x 9 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars 78 customer reviews

Customer Reviews

He has done his homework. Sources are very extensive. Well written and very informative.

I highly recommend this book, there is a lot of great information that has been proven by E.Hendrie.

Great book for people who are just starting to research the subject ,its also good for people who have been looking into the subject for sometime, loved it!

Phenomenal book. Having read Zetetic Astronomy immediately prior, I was familiar with some of the arguments. But Hendrie is a little bit more thorough and convincing in his arguments. Furthermore, he has the benefit of high-res photo evidence, which Rowbotham did not have at his disposal. I was pleased to see Hendrie delve into the moon hoax, another subject I've been interested in. I've tried twice to get through Dark Mission by Richard Hoagland and twice have failed. The book is dry and, to me, not very believable. So I was pleased again when Hendrie affirmed a thought I had about Hoagland. Quote: "Bill Kaysing has good reason to believe that Hoagland is a shill working for NASA, who is trying to divert attention away from the fact that NASA never went to the moon." (p. 183) The final half of the book turns toward the pervasive influence of Judaism throughout the world, including science. This was an unexpected twist, but it fits perfectly -- and, again, dovetails nicely with my research into the Holocaust, Zionism, false flags, etc. The book's primary shortcoming is that it does not address the issue of satellites. I have been looking for a comprehensive text or video on this subject, but have not found one yet. So far, I have suggested this book to my dad and a friend, both of whom have said they will read it.

Very Interesting

Great information!

Great resource for anyone trying to understand how it could be possible that our world is actually not a spinning ball. It covers various different angles on the topic, making a great case for the Flat Earth theory. Great read!

Lots of interesting arguments for the Flat Earth model. Even goes over some disturbing conspiracies that can be linked to almost every major conflict in the world so far.

Love it
