Helen Greaves is a specialist maths teacher. Outside the classroom she spends her time doodling books for Maths Key Stage 2 and 3. Working with her husband, Simon, the couple's approach to Math is quite unique. With their life full of numbers, it's hard to imagine what calculating ideas will arise but you can be sure of one thing, it all adds up to a couple we can count on to deliver great books. Simon Greaves is a specialist maths teacher who specializes in preparing children for national exams as well as running booster classes to help supplement math education. When not tutoring, he spends his time writing on mathematical subjects. Working with his wife, Helen, the couple's

Perfect to engage the kid who finishes early and gets in trouble from boredom!

My third grader loves this. For some reason the order that I placed in early November took until early February to be delivered, which was an problem, not a problem with the book.

The "doodle" part is pretty misleading. There are a few things where drawing would help with understanding, but not many.I teach high school math, and I plan on using a few problems during class. That is why I gave it two stars instead of one.I am disappointed with this book.

Use this in my classroom.

Fun gift for a preteen!

all good

I saw this at Barnes and Noble and loved it. So glad I found it on .

Great way for kids to use their imagination. There is a lot for different ability levels.
