Good

April Chloe Terrazas really hit the nail on the head with her Super Smart Science Series. These books are wonderful. Brightly colored with pronunciation guides, simplistic pictures and just the facts, Chemistry is a great choice for the budding chemist! Also, puts great emphasis on the individual atoms so you may just have a young Einstein on your hands!

My 5 year old really loves science and I bought her a few chemistry books but none as fun as this one! Ok, I never really liked chemistry so my knowledge is very limited but I would say this is a great starting book on chemistry for little ones. Will get others from same author.

LOVE this book and my six year old does too! Will be getting more from this series.

This works well with Middle School students.

My granddaughter is so smart, but often goes unchallenged. She is like a little sponge, so when she got her hands on this book, she ate it up. Don't wait until your kids are older to introduce them to Science.

Buy them All!!!

Book is awesome the printing process left a undesirable watermark through out the book.
