Grapes (Crop Production Science In Horticulture)

Synopsis

Grapes are one of the world's most widely-planted horticultural crops, used to make a variety of fresh, dried and processed products. The science of grapes and grape production are discussed through an examination of wine grapes as well as grapes for fresh consumption and raisin production. Providing historical and current information about the grape industry, the chapters cover genetics, breeding and cultivars, grapevine growth, development and nutrition, climate requirements, pests and diseases and post-harvest production. This informative text thoroughly covers the influence of the environment on grapevine health and productivity, and informs the reader on how grapes are grown and factors affecting grape quality.

Book Information

Series: Crop Production Science in Horticulture (Book 16)

Paperback: 312 pages

Publisher: CABI; 1st edition (January 30, 2009)

Language: English

ISBN-10: 1845934016

ISBN-13: 978-1845934019

Product Dimensions: 9.1 x 0.9 x 6.1 inches

Shipping Weight: 1.5 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 2 customer reviews

Best Sellers Rank: #283,961 in Books (See Top 100 in Books) #69 in [Books > Science & Math > Agricultural Sciences > Crop Science](#) #110 in [Books > Science & Math > Agricultural Sciences > Horticulture](#) #142 in [Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Botany](#)

Customer Reviews

"This book makes a strong contribution to the field and should be useful for students of viticulture, extension agents and grape and wine enthusiasts." (HortScience)

A great book for anyone interested in the growing of grapes, has given me a lot of knowledgeable information. .

This is a well structured book, it gives you a well explained knowledge at the moment you want to have a technical explanation of grapes crop.
