Customer Reviews

Although this is 'touchy' subject, this book deals with polyamory in a very relatable way. I have been monogamous all my life, however I have always considered the alternatives. I think we, as humans, all have different needs - there isn't a one size fits all solution for relationships and this clearly addresses this. If I felt like this was something I wanted to pursue, this guide outlines plenty of practical and actionable steps you can take to explore. Highly recommended if polyamory is something that has been on your mind!

In every page of this book you can learn new things about relationships. If you want to find more about different kind of relationship, and find many interesting things, you will have an interest in this book. This book describes real situations that are happening. But, in this book, you have much more than that; you can find more about different relationship. So if you want to find more about open relationships and much more, read this book and find out more interesting things.

Very insightful take on this ever-controversial topic! I first of all congratulate the author for putting the book out there - going against the grain of 99% of people is something we need more of it. I also thoroughly enjoyed the book. It is a short and concise read that introduces us not only to polyamory - but also away from the age-old monogamy that we know so well. It offers great arguments in favor of polyamory - and a plethora of new vocabulary!. It has great insights on how to deal with jealousy or insecurity, elements I am sure most people will identify with if they ever have thought of going into polyamory. In short, it's a book I would highly recommend for the modern couples of the 21st century.

This read like a college paper...informative but lacked substance and depth. Nothing other books

like The Ethical Slut have already covered in depth. I was hoping for more on poly dating for the single person. How to introduce yourself as "polyamorous" but single.

I was always at loss when it came to this topic .How partners adjusted and kept the 'Secret". But this book describes in detail all that goes into the relationship and how to maintain it. A very touchy subject but it has been very deftly dealt with by the author. If I come across who need help on this topic , I will recommend this book.

Good book and very informational, however it never did come with the bonus free book as it says in details. Good read for your partner!

Accessible writing.

This was a really good book, and even though I have a pretty good working knowledge of poly, this book added to my understanding. It was very straight forward and well worth it.
