Kelly Cowan just celebrated her 20th anniversary at Miami University Middletown, an open admissions campus in Ohio. She received her Ph.D. at the University of Louisville, and later worked at the University of Maryland and the University of Groningen in the Netherlands. She specializes in teaching microbiology to nonmajors, and especially to pre-nursing and allied health students. She herself fell in love with microbiology while pursuing an undergraduate degree in dental hygiene. She has made it her personal mission to hear nurses and dental hygienists she encounters in everyday situations exclaim, "I loved my microbiology class!"

I paid the extra money because it was advertised as having the Connect Access code, but there was no code, so I was disappointed with that. Otherwise the book was in great condition.

no code!

This book did NOT include the Connect access code. I paid extra for that reason and it was not included.

This book was word for word exactly like the newer edition. I was concerned that I would miss something by getting an older edition, but I'm happy to say I passed this class with an A!! Who can afford a \$168 @ the bookstore? I bought this one used for \$2.11 used and never missed a beat.

Great text book on Microbiology

no problems with renting

Paid over \$200 for this "new" textbook and it had no access code

Really poor condition. Seems cracked and open. Ripped and folded pages. Don't mind the highlighter but lots of scribbling in the book. Not pleased.
