# Essentials Of Psychiatric/Mental Health Nursing

## Synopsis

-- Geared toward nursing programs that devote less than six weeks to psychiatric/mental health nursing-- Uses the stress-adaptation model as its conceptual framework-- Each disorder includes: historic and epidemiologic factors, background assessment data, predisposing factors/symptomatology, common nursing diagnoses with standardized guidelines for intervention in care, outcome criteria, reassessment, evaluation, and medications/treatment modalities-- Assessment based on criteria from DSM IV-- Chapters include objectives, glossary, case studies with critical thinking exercises, NCLEX-style chapter review questions, care plans and critical pathways, and approved NANDA diagnoses-- Special topics include crisis intervention, psychobiology, psychopharmacology, sociocultural concepts, therapeutic groups, family as a group, and the suicidal client-- Contains selected case studies or "Build Your Critical Thinking Skills" boxes with three questions per case-- Includes standardized care plans with scientific rationales for every nursing intervention-- Appendix includes critical pathways and a list of common psychiatric behaviors and associated NANDA nursing diagnoses

## Customer Reviews

It's a head shrinking nurse book so I expect it not to be an incredibly stimulating read. However, it was as close to new or new as can be.

This book has good information, it's just not organized very well. I had to look all over the place to

find all of the information (such as history, diagnosis, nursing diagnoses, interventions, treatment) for one disorder.

This is a good textbook

Easy to read, the information is very complete

A really great textbook -- and I've had many!

Perfect for the class. Content solid.

Still using it. I need a book not an e-book

Not well organized
