# How To Write, Publish, And Present In The Health Sciences: A Guide For Physicians And Laboratory Researchers

## Synopsis

From the acclaimed author of the standard reference on reporting statistics in medicine, this new resource explains how to create effective scientific articles, research proposals, abstracts, posters, and slide presentations. It describes how to write efficiently and how to prepare tables, charts, graphs, illustrations, and images for publication. A wealth of key concepts, practical information, common mistakes, and helpful tips make this book invaluable to novice researchers and seasoned professionals alike. This book is sure to become the leading reference on health-science communications!

## Book Information

Paperback: 389 pages

Publisher: American College of Physicians; 1 edition (September 1, 2009)

Language: English

ISBN-10: 1934465143

ISBN-13: 978-1934465141

Product Dimensions: 7 x 0.9 x 9.1 inches

Shipping Weight: 1.9 pounds (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars 8 customer reviews

## Customer Reviews

A lucid, knowledgeable, and engaging guide on to how to publish your research, and how to do it well. Its like having a journal editor whisper in your ear as you write. This book has information that nobody tells you but is critical to know when you submit to a journal. A few hours with this book will provide wisdom that otherwise might take years of frustrating journal submissions to acquire (and not to mention minimize your rejections). --Steven Goodman, MD, PhD, Johns Hopkins Schools of Medicine and Public HealthLangs earlier book on how to report medical statistics proved so useful to me that I bought a second copy to keep in my home office. His new book features the same type of pragmatic advice on the nuts and bolts of scientific writing. A more descriptive subtitle for this book might be things I wish I knew when I was starting out. This book could have saved me considerable effort over the years. --David A. Grimes, M.D., UNC School of Medicine, Chapel Hill,

NCTom Lang goes beyond being an expert in health science publishing because his books increase the potential of everyone in the field. In each chapter of this book, he presents realistic examples in considerable detail, allowing readers to learn approaches that are truly helpful to authors and editors. --Cate Timmerman Co-President Palladian Partners, Inc.

There is not much in the book that you can't find online for free. Universities have websites to help improve writing skills and a simple google search can yield all of the same information in this book. If your professor does not insist that you buy this it, don't. There are no assignments in it so it's not likely you will miss anything without it.

I actually took the class from Mr. Lang at Ohio State which was a pretty good class. This is the text that he wrote. This serves as a good entry level text for those that are new to writing for publication in scientific and medical journals. It gives good points on those questions you ask your self like what font to use on a professional poster? or what information a plot should show for publication? Has a follow-up book "How to Report Statistics in Medicine" which is also a good resource to have on your bookshelf.

A remarkable book covering all aspects of planning, writing and submitting clinical journal articles for publication. The very thorough treatment makes this well worth reading for any student beginning a healthcare career, or the clinician wanting to produce more persuasive and rigorous publications.

This is a well written book with many good quotes and relevant similes included. Well worth the cost of this book.

Good book.

This is a good book to learn how to write clinical and medical results of our research. Simple and direct.

Well, only went through couple of chapters so far - so really too early to adequately assess, but so far promising what I thought of it. An indepth review with many helpful hints. The 'history' part of it is interesting in a way to think about the purpose of why we are doing what we are doing.

The book was favourably reviewed by T.D. Minton in the Journal of Medical English Education Vol. 9, No. 1 (January 2010)
