Customer Reviews

McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide

Bought for my daughter to use for homework/study. Her Geometry class is taken completely online with the Agile Minds and the classroom teaching isn't helpful to her. Nor does she have access to study materials without logging on to Agile Minds. This is a great addition to help her learn the subject.

The book arrived in good condition. Very good learning tool, easy to follow.

Item better than described; trustworthy seller. Highly recommended!

Good

The book was exactly what I expected. My son's high school uses the book and we purchased it for the summer to prepare.

We purchased a Geometry book from for our 10th grader for her tutoring session. I was amazed at the quality of the book. I thought it was brand new. The only way you could tell it had belong to someone else was the name in the front of the book. This was an excellent purchase.
