An Introduction To Coastal Zone Management

Synopsis

This book provides a comprehensive introduction to the subject of coastal zone management. The authors review the existing management framework at the federal, state, and local level, describing cornerstone federal programs and innovative and leading state, regional, and special area programs. Throughout, they focus on: coastal ecology and the physical attributes of the coastal zone population trends and growth pressures confronting coastal areas policy issues and conflicts facing those in coastal management In addition, they examine key elements of successful coastal management, as they identify deficiencies in current efforts as well as methods for addressing those deficiencies. An Introduction to Coastal Zone Management provides a firm understanding of management approaches and strategies in use around the country, focusing on those that have proven most effective.

Book Information

Hardcover: 210 pages

Publisher: Island Press (June 1994)

Language: English

ISBN-10: 1559632801

ISBN-13: 978-1559632805

Product Dimensions: 9.3 x 6.2 x 0.8 inches

Shipping Weight: 13.6 ounces

Customer Reviews

Timothy Beatley is professor in the Department of Urban and Environmental Planning at the University of Virginia in Charlottesville, Virginia. His books include Green Urbanism (Island Press, 2000), The Ecology of Place (Island Press, 1997) and Habitat Conservation Planning (University of Texas Press, 1994). David J. Brower is research professor in the Department of City and Regional Planning at the University of North Carolina, Chapel Hill and co-author of Catastrophic Coastal Storms (Duke University Press, 1989) and co-editor of Understanding Growth Management (Urban Land Institute, 1989). Anna K. Schwab is research associate at the Department of City and Regional

Planning at the University of North Carolina, Chapel Hill. --This text refers to an out of print or unavailable edition of this title.

Very happy with purchase, just as described and what I was looking for. Arrived right on time

Now in a second edition with updated statistics, references to legislation, discussions, and new knowledge about creative coastal design, and collaboratively written by Timothy Beatley (Professor, Department of Urban and Environmental Planning, University of Virginia), David J. Bower (Research Professor, Department of City and Regional Planning, University of North Carolina, Chapel Hill); and Anna K. Schwab (Research Associate, Department of City and Regional Planning, University of North Carolina, Chapel Hill), *An Introduction To Coastal Zone Management* is a scholarly and comprehensive look at the complex problems of environmental management of coastal areas. Written for students and professionals, *An Introduction to Coastal Zone Management* covers a wealth of topics including shoreline erosion, lake stratification, coastal sprawl, and much, much more. *An Introduction To Coastal Zone Management* is very highly recommended reading for anyone with a determined interest in the field and an essential addition to Environmental Studies academic reference collections.

As a student of geography, I was given the opportunity to do some shoreline management work for the local county. Although I had taken some classes regarding shorelines, I needed a crash course in coastal management, and I was pointed to this book. Within two days, I knew as much as I needed to know about coastal issues. The book covers a wide variety of issues, ranging from the history of coastal population concentration, environmental issues, private property rights, and zoning and other useful information for the planner. This book gave me a great introductory knowledge, and was able to satisfy most of my questions. I recommend this book to anyone who thinks they may be interested in Shoreline Management, City or Urban Planning, or Environmental or Population issues.
