" The Midwest Book Review, James A. Cox, Editor-in-Chief

This book has everything home business owners need to know to make sure they take advantage of all the business deductions they are entitled to take. The book is organized into practical, easy-to-use categories of the most commonly-used home business tax deductions which not only explain the deductions, but also how to make decisions so home business owners can take advantage of them. Includes lots of interesting and relevant examples that make the book easy to read and understand.

A lot of insight on the IRS and how they can create major problems when you don't do things the right way. Its worth the purchase as a home base handbook.

Present for my daughter who spent two years winging it on her business taxes. NOLO always comes through!

Very general and vague. Not helpful and not useful.

I didn't want to love this one, because it's rather expensive compared to other tax books and I'd rather recommend something less expensive that does the same job. But this is REALLY thorough. I've never heard of the some of this information. Some is quite new--tax laws change. You can buy a book that lists a thousand deductible expenses, but usually you know what you need for your business, and this book tells you how to know if something is deductible by analyzing it the way the IRS would. Business Taxes based on what the IRS is looking for--also how to set up a

business--types of biz (and how that affect taxes). Ideas for accounting & setting up books. Sometimes it's surprising what you CAN deduct and then sometimes it's surprising what you can't. There is now a way to deduct supplies, without accounting for what percentage you've used, and a way to deduct a \$2000 computer or an office desk without using depreciation. I did get it from my library, but I'll buy it to have on hand throughout the year. I'm recommending it to my home business friends.
