The Official Laboratory Research Notebook (100 Duplicate Sets)

Synopsis

As the company that has been providing chemistry labs with the best-selling lab notebook for years, Jones and Bartlett Publishers is pleased to present a new generation of lab research notebooks. These notebooks combine the features from earlier versions that made them best-sellers with exciting new ones.

Book Information

Paperback: 100 pages

Publisher: Jones & Bartlett Learning; 1st edition (July 22, 1997)

Language: English

ISBN-10: 0763705160

ISBN-13: 978-0763705169

Product Dimensions: 0.8 x 8.5 x 11.2 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 48 customer reviews

Best Sellers Rank: #281,461 in Books (See Top 100 in Books) #136 in Books > Medical Books > Allied Health Professions > Medical Technology #1023 in Books > Science & Math > Chemistry > General & Reference #1137 in Books > Textbooks > Science & Mathematics > Chemistry

Customer Reviews

As a biochemistry PhD student (and biochemistry BS as well) I have taken more laboratory classes than I care to share. This was my first laboratory notebook and really helped me develop superb note-taking skills for one reason in particular. Each page in this notebook is backed by a carbon-copy sheet so that you can rip it out and hand in a copy. At the end of each experiment, my teacher would tell us to rip out the "copy" page for his records. He did this so that when we handed in the notebook at the end of the semester he could ensure that we didn't add or change anything in the notebook because he had his copy to reference. Although at the time I hated it, I actually thank that professor now for teaching me to take copious notes WHILE PERFORMING AN EXPERIMENT. I cannot stress the importance of doing this and I think this notebook is ideal for an up-and-coming scientist who wants to learn to hone their observatory skills. I would recommend anybody teaching a laboratory class to force their students to hand in the carbon copy as my professor did.

Have already gone through several of these. Very pricey but handy!

As advertised.

As a college undergraduate you can fit at least two one-semester lab courses in here. I used mine for general chemistry (two semesters) and then still had room to use it for microbiology research for an additional semester.

Overall this is a notebook that is specifically designed for a laboratory work (as stated in its name). The pages and its copies are numbered. Graphing sheet paper is used. The margins are decent as well as the header. The spine of both of mine started coming apart after 2 semesters of use, but it did sustain some hard handling. The one thing that is lacking is the ability to tear out originals and copies well. The carbon copy is hard to tear out evenly, while the original is not possible without scissors. I know that originals are supposed to be kept in place, but each professor has his/her own demands.

The paper is better than the college bookstore lab notebooks and since, the duplicate is white, the writing is easier to read. I love how it is bound and not spiral-no chance of it getting wet. The only downside is that the periodic table is only in black and white, but the additional information on it is very useful. The 3-hole punched papers make it easier for me to bring along, instead of lugging along a large lab notebook. Overall, I am satisfied with my purchase.

It was exactly what the instructor had required. I only used half of this book for general chemistry part 2. So if you think you may need a notebook for multiple chem labs, this one may get you through two.

I chose to buy this online because it was a lot cheaper than in stores and on other sites. It was approved by my professor and I liked it over the other ones students were using.
