I have a Degree in Fashion Design, and the one class I didn't get to take was fashion illustration. (They were cutting the program and I had to miss that class to get others in that were more important, sad.) I thought that this book was excellent. It really helped me to understand coloring and shading my sketches. I would suggest this book to anyone who loves to draw fashion sketches.

the book goes into small detail on how to draw a figure. it show pictures of eyes and brows, lips, hands, faces and profiles, but it does not go deep into how to draw them. it tells you to start your figures with stick drawing and from there you add the other details of the human body. not easy if you're someone who cannot draw a shaply leg, arm, hand or head. the book is nice, but it what it saids it is, tips.

This is more like a text book, but very easy to follow. My 9 year old daughter LOVES it. She's just starting to dabble in fashion sketches, and what's great about this book is that it breaks it down step-by-step. It's not just a collection of blank bodies to color (there are no stencils, stickers, etc.). It actually teaches you HOW to draw the bodies and faces, emphasizing proportion and scale. It has lots of vibrant examples to use for inspiration, but it's really about teaching you the concepts of design sketches. Highly recommended! Great quality.

This book was a gift for my 12 old daughter. She liked it so much. Book is great illustrated, has plain explanation. It is good for beginner designer. It explains what tools any designer must have at first.

Bought this as a present for my 6 year old niece who is into drawing fashion. I thought it may be too advanced for her, but it had good reviews and thought I'd try it. I went through the book when I got it and I think it's event too advanced for me. You never know what a kid is capable of and how they will use there imagination with it so I'm still going to give it too her. I think it would be a great book for a teen who has better fine motor skills for drawing and is into designing clothes for women.

After a long visit to a book store out of town my daughter did not want to put this book down. She put it on a list for Christmas of course we did not buy it there because we knew we could get it on with out her finding out and possibly a better deal and we got both. When I was at the book store with her I just flipped through the pages and said that looks really nice. Did not pay that much attention in the store at it. We have purchased so many of these books and sets as well.After

receiving this I of course done a good look through at it. My wife being an art lover enjoyed this one as well and understood why my daughter wanted it so bad! Lately we have been running accross the style drawing books that your child decorates the clothes on the dolls body which is already drew and then you have those boring step by step books with no flare to bore you to death. With a child that is way past those steps it is hard to keep them enjoying what they like to do when they are not inspired. This book is great for inspiration. Well we think it is for our daughter. She is not allowed to get into the TV drama stuff so what she likes is what she learns fom books. She also likes to make her designs to doll size designs and actually sew them into doll clothes for her American girl dolls. Anyway back to this wonderful book It is worth every penny and alot more.This one shows:creating texture, drawing techniques,color basics a color wheel,fashion terms, fashion textures, Figure proportions, poses heads hands ..... so much more. Then it gets into fashions from new styles to some vintage styles. Also body templates. All I can say is I think once she gets this she will be busy for a long time with it. I am glad she found it. The flare in the book was very inticing and the styles were wonderful. This would be a great book for any age. My daughter is 10 but I could see young adults even enjoying if it was something they wanted to get into.

Lots of information, but the pages don't lend easily to being drawn on. It's ok and good for the price.

Bought for my 7 year old and she loves it. It has absolutely helped her in her drawings!
