How To Get Every Earned Value Question Right On The PMP® Exam: 50+ PMP® Exam Prep Sample Questions And Solutions On Earned Value Management (EVM) (PMP Exam Prep Simplified) (Volume 1)

Synopsis

Aileen's view on PMP Exam Preparation To learn to ride a bike, a person must ride a bike. To learn to pass the PMP[®] Exam, a person must practice with hundreds and hundreds of PMP[®] Exam Prep sample questions. This book is the first book in our series of mini- books - PMP[®] Exam Preparation Simplified Series Over the last 16 years Aileen has helped over 10,000 project managers in her workshops obtain their PMP[®] credential. Often the participants in Aileen's workshops are successful project managers who may lack experience in specific topics on the PMP[®] Exam. The topics that participants seem to struggle with the most are: Earned value Management (EVM) Contract types and calculations(FPIF, CPIF, PTA, etc.) Network diagrams including float, free float, project float, leads and lags Financial based questions including IRR, ROI, etc. Statistical based questions There is one thing all of these areas have in common and it is math. Aileen has decided to create mini-books in each of these areas so that students can gain both the knowledge and the confidence to get these questions right. Many project managers want to study just enough to pass the PMP[®] Exam and not one second more. Aileen's view is to practice on enough sample questions in each area so that the project manager is confident he/she will never get a question in that area wrong. While the primary goal of this book and Aileen's workshops is to help you pass the PMP[®] Exam, Aileen hopes that you will also walk away as a more knowledgeable and successful project manager.

Aileen Ellis, PgMP[®], PMP[®], is The PMP[®] Expert. She is the owner and proudly the only instructor for AME Group Inc., a Registered Education Provider (REP[®]) through the Project Management Institute (PMI[®]). She personally instructs project managers to gain the confidence and knowledge to pass the PMP[®] Exam, the CAPM[®] Exam and the PgMP[®] Exam. She has helped more than 10,000 professionals obtain their PMP[®] through her PMP[®] Exam Prep Workshops. Working with thousands of project managers from dozens of countries, Ms. Ellis has gained a thorough understanding of the ins and outs of the PMBOK[®] Guide, the PMP[®] exam content, and proven PMP[®] Exam Prep strategies. Ms. Ellis began teaching PMP[®] Exam Preparation Courses in 1998. Over the years she has mastered how students learn best and has incorporated those lessons and methods into her books. Her approach is focused on understanding the Project Management Processes and their interactions, with limited memorization. Ms. Ellis not only leads workshops to help students study for and pass the CAPM[®], PMP[®], and PgMP[®] exams through review of content and hundreds of sample questions, she provides materials (books, sample questions) to other REP[®]s and PMI[®] Chapters to support their educational efforts. Ms. Ellis lives in Colorado Springs with her husband, Terry, and their two children, Nick and Alex. AME Group, Inc. was founded in 1997 by Aileen Ellis, PMP, PgMP. Aileen's sole aim is to provide you, the project manager, the knowledge and confidence to pass the PMP Exam without wasting your time and money. Aileen personally facilitates all of AME Group Inc workshops. From helping you with your PMP (or CAPM) application, preparing for the workshop, taking the workshop and passing the PMP[®] exam; Aileen is by your side as your PMP Coach. AME Group Inc. is a Registered Education Provider (REP) through the Project Management Institute (PMI).

This Kindle book is largely a good resource for study and will benefit students. The book is very short and is composed of a preface of 4 pages another section titled Set Up composed of just over 1 page. Part One is a very brief explanation of key Earned Value terms and concepts. On the first page is a link to a short You Tube Video (8 Min). The video will be of value to those who need a very basic refresher of Earned Value. Earned Value is explained in a clear fashion in this video. The explanations in Part One are accurate and useful, with one exception. The TCPI-BAC and TCPI-EAC formula explanations and interpretations are not accurate. There is a wide and very

common mis-understanding of this key Earned Value index in Earned Value books. Thus far, very few authors have accurately explained and interpreted the TCPIs. Part Two is the practice test of 50 questions and the test questions are very well written. Writing good test questions is difficult and creating a good set of multiple choice answers is challenging. This author has done a fine job in both respects. I took the test as any student would with pencil and calculator at hand. All test questions were accurate presentations of Earned Value and will challenge the student. One area of improvement is related to the TCPI issue cited above. The test could be improved through the incorporation of TCPI-EAC and TCPI-BAC questions and testing student interpretation. In summary, if you need to practice Earned Value formulas, then this practice test will help you towards that goal. However, you will need to seek another source for accurate understanding and interpretation of the TCPI-BAC and TCPI-EAC. Buy the book and test your understanding of Earned Value.

I passed my PMP exam on Saturday, August 8, 2015; and, am confident that I successfully answered all of the Earned Value questions correctly because I read and completed the problems in this book. My real appreciation for having acquired this book occurred when I was exhausted and was approaching the last 50 questions during the exam. Unexpectedly, an earned value question popped up and I did not slow down due to any confusion. Due to the repetition and practice I received, I knew instinctively if a project was on/over/under budget and on/ahead/behind schedule; and it did not matter if I was looking at a graph, or given a value such as a: CPI, CV, SPI, SV or VAC. In addition I completely understood the two TCPI formulas, and when and where they were used. I am grateful to the author, Aileen Ellis for dedicating her time and effort to developing this book as a study aid for those of us (in my case am now a PMP) who are sincerely interested in becoming a PMP.

Since I incorporated this book "cover to cover" in my study for the PMP exam, I have not gotten one Earned Value Question incorrect nor have I been stopped by a practice exam question - even those designed to "stump the chump". Aileen's method teaches the student in a manner that allows a person a very rapid progression - from knowledge and comprehension to application and analysis and total comfort in evaluating and answering the questions correctly and efficiently. If you are having difficulty with this concept - invest in yourself and get this book. Mere hours later you will be thanking yourself (and the author!). Update: passed the exam today and certain I answered all of these types of questions correctly.

I recently passed the PMP exam with the expert guidance of Aileen Ellis' trio of books: How to get every earned value question right on the PMP exam, How to get every network diagram question right on the PMP exam and How to get every contract calculation question right on the PMP exam. Each book is a quick read establishing parallels between theory and practice. The sample questions spanned the most basic concepts to the most complex. Utilizing Aileen's books give me the confidence needed to pass complex areas of the exam in a short period of time. I highly recommend these books to anyone requiring focus on these aspects of the exam.

My wife and I recently took and passed the PMP. This book was extremely helpful in helping us with the Earned Value portion of the material. The problems in this book approach Earned Value from all angles in a straightforward and consistent manner. By the end of the book, we knew that we could indeed count on getting all of the EV problems right. While the title of this book clearly explains what it is, I would make the following suggestions to the author for a future publication. Instead of Earned Value alone, I would have liked to have some problems on the different types of procurement contracts (FPIF, CPIF etc...) and Expected Monetary Value (EMV). There are none in the PMBOK and only a handful in study guides such as the PMP for Dummies. Again, this book clearly explains what it is and it delivers on its promise. For the price it was the best study aid I used for the PMP.

You can clear the earned value questions on the PMP exam by following Aileen's formulas in this book. When I first started studying, I was overwhelmed by all the formulas I needed to learn and when to apply which ones. I ordered this book and completed it within a couple days. By applying her formulas on the cost questions, I was now scoring up in the 80's and 90's on my practice tests. Other PMP prep materials don't cover the material as succinct as Aileen's book does. Go with this book instead of any others. Simply put, this book will help get you to your final destination - passing the PMP exam!
